

Earmark Account Descriptions as applicable to UNMC

Agency	Type of Projects
Agriculture	*biotechnology *genetic technologies*nutrition
Science, Commerce, Justice	*forensic science *homeland security *first responders *space radiation and medical capability during NASA missions *behavioral health and performance in space *magnetic resonance imaging for proteomics research *enhancing technical standards and advancing measurement science
Defense	*telemedicine *traumatic brain injury *combat casualty care *personalized medicine *blood safety *human performance *vaccine development *cell-phone-based health monitoring systems *countermeasures to chemical, biological and radiological threats *biotechnology to counter chemical and biological-warfare *minimally invasive surgery simulators *virtual environment simulators *biosurveillance *products to protect the warfighter from chemical, biological, radiological threats
Energy & Water	*biology and medicine *biotechnology *scientific computing research *medical imaging *bioinformatics *genomics *computational biology *molecular sciences *genetics and microbiology *neurobiology *biomedical engineering *medical robotics *environmental health *nuclear medicine *genome and nanotechnology research *material science *energy efficiency
Foreign Ops/ State	*international projects
Labor/HHS/Educ	bioinformatics *curricular development (science, bioinformatics) *technology upgrades and infrastructure *head injury *minority education; HHS: construction and renovation of research facilities *purchase imaging equipment *bioterrorism preparedness *imaging *continued education of allied health prof *improving medication-related outcomes
Transportation	*garages *streets *bridges
