ASD Diagnostic Evaluation Module 4

Objectives:
1. Describe the components of evaluation and the evidence-based diagnostic tests and other evaluations used to diagnose ASD.
2. Know the process of diagnostic formulation using clinical judgment to integrate clinical data with DSM-IV diagnostic criteria

Materials:
- Video from Autism Speaks includes ADOS administration (brief) http://autismspeaks.player.abacast.com/asdvideoglossary-0.1/player/autismspeaks
  o Screening and Diagnosis (video on left)
