

WE SAVED HIS LIFE 1,000 TIMES TODAY.

Stroke, heart attack, deadly drug interactions: name a life-threatening health condition and the remarkable patient simulators at UNMC's Michael F. Sorrell Center for Health Science Education can make it seem like the real thing. In fact, the Sorrell Center is one of the most advanced facilities of its kind in the entire nation. Because the more hands-on experience we give our students and residents, the faster and smarter they'll respond when the patient is you. [Breakthroughs for life.](#)
