

## College of Allied Health Professions **Interim Admissions Policy**

In response to changes in academic policies and procedures being implemented at institutions of higher learning across the U.S. in response to the COVID-19 pandemic, and with the intent of supporting the continuous education of students pursuing admission to allied health profession education programs at the University of Nebraska Medical Center (UNMC), the College of Allied Health Professions (CAHP) is instituting the following interim admissions policy effective immediately:

Grades of “Pass,” “Satisfactory,” or “Credit” (or grades of equivalent nomenclature) issued by an accredited institution of higher learning for course work completed during the Spring and Summer 2020 academic terms and the 2020-2021 academic year, *will be accepted* for all prerequisite courses required for admission into any CAHP health profession education program. There is no limit on the number of credit hours that will be accepted. The policy applies to the current and all future admission cycles.

The CAHP acknowledges that as a result of the COVID-19 pandemic applicants may have encountered situations impacting their ability to meet other application requirements as well. Applicants with questions regarding application requirements are invited to contact the CAHP Office of Enrollment Management & Student Affairs for further discussion.
