College of Allied Health Professions

Professionalism Ceremony

August 2020
History of the White Coat

The White Coat Ceremony was first introduced in medical schools in 1993. The ceremony has since become a rite of passage for many students in health profession education programs across the United States, as they enter their professional program or begin clinical encounters with patients.

During this ceremony, students don their first white coat. The white coat symbolizes competency, integrity, and dedication to the service of humankind.

The UNMC College of Allied Health Professions refers to our unique ceremony as the “Professionalism Ceremony,” to emphasis our belief that our students begin their life-long commitment to professionalism at the outset of their programs of study, rather than at the time of graduation and formal entry into their chosen profession.

The ceremony focuses on professionalism, celebrating the values of ethical behavior, compassionate care, and service to others. In recognition of values and expected behaviors, students recite an oath acknowledging the unique privilege and responsibility they have to enter the lives of patients in a special and time-honored way, and publicly dedicating themselves to a life of continual learning and service.
Welcome ................................................................................ Kyle P. Meyer, PhD, MS, PT, FASAHP
Dean, College of Allied Health Professions
Tammy Webster, PhD, MPA, RT(R)(M), FAEIRS
Program Director and Assistant Dean for Academic Affairs

Alumni Welcome ........................................................................ Kevin McGuire, MHPTT, MLS(ASCP)CM
President, UNMC College of Allied Health Professions Alumni Council

Dean’s Remarks ........................................................................ Kyle P. Meyer, PhD, MS, PT, FASAHP
Dean, College of Allied Health Professions

Keynote Address ...................................................................... Sheritta Strong, MD
Director of Inclusion, UNMC

Presentation of Professions and White Coats ................................ Program Directors

Each of the following programs is holding a separate ceremony:

- Cardiovascular Interventional ............................................. Tammy Webster, PhD, MPA, RT(R)(M), FAEIRS
  Program Director and Assistant Dean for Academic Affairs

- Clinical Perfusion ................................................................. David W. Holt, MA, CCT
  Program Director

- Cytotechnology ................................................................. Amber Donnelly, PhD, MPH, SCT(ASCP)
  Program Director and Assistant Dean for Student Affairs

- Diagnostic Medical Sonography ......................................... Kim Michael, MA, RT(R), RDMS, RVT, FSDMS
  Program Director

- Genetic Counseling ............................................................ Holly Zimmerman, MS, CGC
  Program Director

- Magnetic Resonance Imaging .............................................. Stephanie Vas, MA, RT(R)(CT)(MR)
  Program Director

- Medical Laboratory Science .............................................. Karen Honeycutt, PhD, MEd, MASCP, MLS(ASCP)CMSCM
  Program Director and Chair of the Department of Allied Health Professions Education, Research, & Practice

- Medical Nutrition ............................................................... Corrine Hanson, PhD, RD, LMNT, FAND
  Program Director

- Physical Therapy ............................................................... Betsy J. Becker, DPT, PT, PhD, CLT–LANA
  Program Director and Chair of the Department of Health & Rehabilitation Sciences

- Physician Assistant .......................................................... Shaun Grammer, DMSc, PA–C
  Program Director and Chair of the Department of Medical Sciences

- Radiation Therapy ............................................................. Lisa Bartenhagen, MS, RT(R)(T)
  Program Director and Chair of the Department of Clinical, Diagnostic, & Therapeutic Sciences

- Radiography ....................................................................... Tammy Webster, PhD, MPA, RT(R)(M), FAEIRS
  Program Director and Assistant Dean for Academic Affairs

Pledge of a Healthcare Professional ...................................................... Led by Programs

Closing Remarks ....................................................................... Program Director
Dr. Strong is an award-winning distinguished fellow of the American Psychiatric Association and an adult psychiatrist at the University of Nebraska Medical Center (UNMC). As a leader in medical student education, she is the Psychiatry Director of the Neurosciences Course at UNMC. She is an Omaha Native and her hometown is where she received her training, including her post-graduate education that consisted of a residency in the Creighton–Nebraska Psychiatry training program.

She serves in many roles at UNMC, including as the faculty advisor and mentor to G.R.A.D.S., which is an inclusive, campus-wide, peer-mentoring group, a founding member of I.A.M.H.O.M.E. (diverse group of faculty, staff, and students), and immediate past faculty board chair and psychiatry director for the UNMC student-run free (S.H.A.R.I.N.G.) clinics. She provides psychiatric care at the Charles Drew Health Center.

Nationally, she has served on a panel for women’s inclusivity, BraveEnough, and co-led a workshop on microaggressions at the Association of Directors of Medical Student Education in Psychiatry in Portland, Maine. In addition to her new role as UNMC’s Director of Inclusion, she recently served on a regional panel for the Central Area of the Omaha Chapter Links, Inc., to discuss ways to cope during the COVID-19 crisis.

Dr. Strong has received several awards locally and nationally including the Urban League of Omaha Health Award, the Omaha Chapter of the National Coalition of Negro Women’s (NCNW) Women in Medicine Award, the UNMC’s Alumni Early Career Achievement Award, and the American Psychiatric Association’s Nancy C.A. Roeske, M.D. Award.

She is also a member of University of Nebraska’s Diversity Officer’s Collaborative, Nebraska Psychiatric Society, the National Medical Association, the Omaha Chapter of the Links, Inc., and Alpha Kappa Alpha Sorority, Inc.
**Cardiovascular Interventional Technology**

Cardiovascular Interventional Technology involves specialized radiographic techniques used in angiography, interventional procedures, and central venous access procedures, which combine technical, radiologic, and clinical skills. The program of study is nine months, following the completion of a Radiography program, leading to a Bachelor of Science degree in Medical Imaging & Therapeutic Sciences or Post-Baccalaureate Professional Certificate in Cardiovascular Interventional Technology.

_Justin Stephens_

---

**Clinical Perfusion**

Clinical Perfusionists run a complicated machine that works like a person’s heart and lungs. This keeps a person alive while their heart is stopped for open-heart surgery. The perfusionist also runs equipment that saves and cleans blood during operations. The program of study is 21 months, following the completion of a bachelor’s degree, leading to a Master of Perfusion Science degree.

Cytotechnology

Cytotechnologists perform microscopic examinations of specially stained slides of human cells from sites throughout the body for the early diagnosis and treatment of disease. The program of study is 12 months, following the completion of a bachelor’s degree, leading to a Post-Baccalaureate Certificate in Cytotechnology. UNMC partners with healthcare systems across the country to provide on-site education for cytotechnologists.

Diagnostic Medical Sonography

Sonographers use sophisticated equipment that directs high frequency sound waves (ultrasound) into areas of a patient’s body to generate images for diagnostic purposes. The program of study is 12 months, following the completion of a Radiography program, leading to a Bachelor of Science degree in Medical Imaging & Therapeutic Sciences or Post-Baccalaureate Professional Certificate in Diagnostic Medical Sonography.

**Medical Laboratory Science**

Medical laboratory scientists (formerly known as medical technologists) perform and interpret complex chemical, biological and molecular laboratory tests that help physicians detect, diagnose, and treat disease. The program of study is 11 months, following the completion of other undergraduate coursework, leading to a Bachelor of Science degree in Medical Laboratory Science.

Physical Therapy

Physical therapists (PTs) evaluate and treat patients with movement dysfunction associated with injury or disease, as well as help to prevent conditions that impair movement. The program of study is three years, following the completion of a bachelor’s degree, leading to a Doctor of Physical Therapy degree.

**Physician Assistant**

Physician Assistants (PAs) are medical professionals who diagnose illness, develop and manage treatment plans, prescribe medications, assist with surgery, and often serve as a patient’s principal healthcare provider. The program of study is 28 months, following the completion of a bachelor’s degree, leading to a Master of Physician Assistant Studies degree.

Pledge of a Healthcare Professional

From this day forward, I vow to always conduct myself in a manner consistent with the expectations of the profession I have chosen.

I will treat the faculty, staff, fellow learners, and patients I serve with respect. I pledge to uphold the highest standards of professional and personal integrity and, through my words and actions, encourage others to do the same.

I will hold sacred the professional confidences shared with me and respect ethnic and culturally-based beliefs. I will provide equitable care, and work to eliminate healthcare disparities. I will enter professional discussions with an open mind, and a collegial spirit.

I promise to honor the patients I will serve, and my profession, by striving for the highest level of competence in my discipline for as long as I practice. I will be a contributing member of the community of health professions scholars and enrich the classroom and clinic with my well-reasoned ideas and opinions. I will contribute to the professional advancement of others by sharing innovative methods of practice and mentoring those who would gain from my knowledge and experiences.

I will abide by the laws and the code of ethics that govern my profession, and by the Honor Code of the College of Allied Health Professions. I will consistently behave in a way that brings honor to my University, my College, my program, and my profession.

From this day forward I accept the mantle of “professional,” and commit to think, speak and behave in a manner consistent with this high calling, and as proclamation of this fact to the society I pledge to serve.

Welcome to the UNMC College of Allied Health Professions!

Your college’s alumni council, along with the UNMC Alumni Association, are excited to welcome you into your profession and wish you the best as you embark on this next chapter in your professional life.

Alumni are proud supporters of your white coat professionalism ceremony and have provided financial resources to support yours this year—even though it is being held in a different, virtual format.

We are excited to have you join the healthcare field you have chosen and know that you are going to make a difference in the lives of those you serve. Good luck!

– the CAHP Alumni Council
Acknowledgements

We gratefully recognize the UNMC College of Allied Health Professions Alumni Council for their support in today’s ceremony.

Thank you to all the staff and faculty who helped with this event. Thank you to those friends and family members who assisted with coating.

A special thank you to the members of the Professionalism Committee:
