The College of Medicine Innovation Fund supported:

- The people and programs of the UNMC Alumni Association.
- The purchase of a “test bank” for M2 students. The “test bank” is a database of questions designed to help prepare medical students for important examinations to assess their understanding of the sciences basic to the practice of medicine.
- The purchase of a series of short how-to videos demonstrating common medical procedures on manikins and patients.
- The work of the College of Medicine Student Wellness Advocate. The student advocate promotes student well-being, self-care, professionalism and informal mentoring opportunities. Through a variety of activities, such as “Sip and Paint Night,” a Trivia Night and many others, the student advocate provides a nurturing, supportive and uplifting environment for all medical students.

“Please accept my sincere appreciation for your tremendous support of the UNMC College of Medicine’s Innovation Fund. Private support is critical to the success of our medical students, and the impact of your generosity is widespread. By making this important investment in our students, you are providing valuable resources, experiences and opportunities outside the classroom to help them become extraordinary physicians. On behalf of the students who benefit from your generosity, thank you for all you do to advance the UNMC College of Medicine.”

Bradley Britigan, M.D.
Dean, UNMC College of Medicine
