Approved by the Nebraska Physical Therapy Association for 16 contact hours.

Lecturer:
Eric Chaconas, PT, DPT, PhD, FAAOMPT

This seminar covers current best evidence in the physical therapist’s management of the most common extremity syndromes seen in a general outpatient orthopedic practice. Lecture material provides participants with the current body of literature surrounding the most effective management strategies using exercise and manual therapy. A special emphasis will be placed on treatment progression and exercise prescription.

Supported by the UNMC College of Allied Health Professions Division of Physical Therapy Education and the Alumni Council
