THE PATIENT

LOC

A/O x 4

HEART RATE

130

RR

32

BLOOD PRESSURE

116/90

SKIN

Pale, cool, dry

PUPILS

Constricted

SPO2

96%

NOTES

He is agitated and crying intermittently. C/O burning of his eyes and says he can't feel his lips. Says he thought the car might have been on fire when they hit the deer.

THE PATIENT

LOC

Alert, tracks

HEART RATE

110

RR

30

BLOOD PRESSURE

82/40

SKIN

Pale, cool, wet

PUPILS

sluggish

SPO2

86%

NOTES

Patient is coughing up blood and is unable to speak

THE PATIENT

LOC

Alert

HEART RATE

148

RR

36

BLOOD PRESSURE

102/86

SKIN

Pale, cool, dry

PUPILS

pearl

SPO2

95%

NOTES

Dad is holding the child in an effort to reduce strain on her arm as well as to attempt to keep her still. He does not look well. He was grinding his deer and stopped to run to the bathroom. He heard the screaming and the grinder from the bathroom and ran out to find his daughter standing on the counter.

INSTINCTS?

MUST.... RESIST....

SURGICAL OUTCOME

THE PATIENT

LOC

Alert, confused

HEART RATE

134

RR

32

BLOOD PRESSURE

142/94

SKIN

Pale, warm

PUPILS

Dilated, sluggish

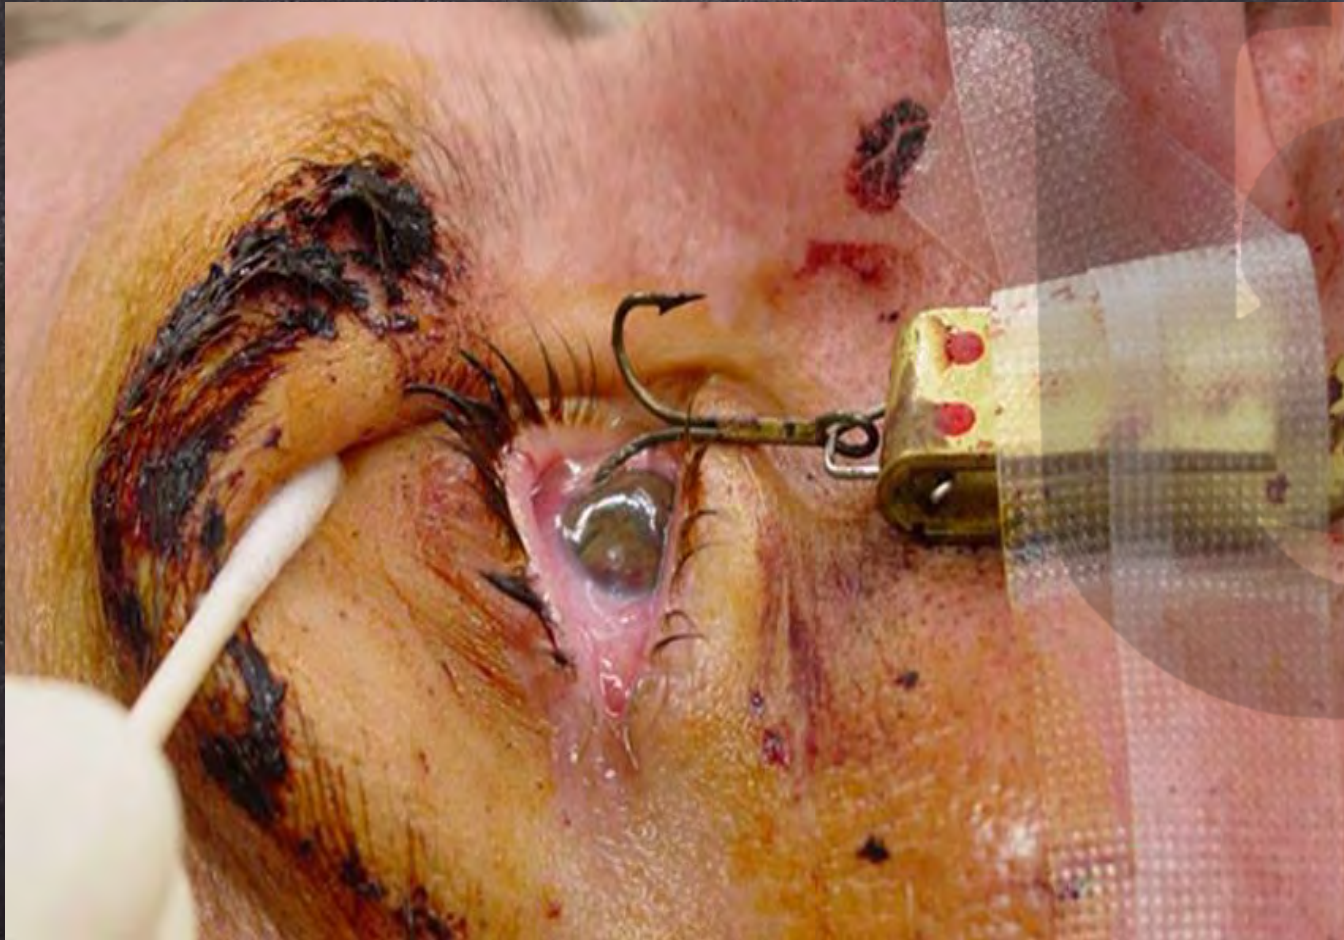

SPO2

91%

NOTES

There are several bystanders who want to help, or want you to do something. They're loud. And bossy. And kinda pale themselves.

THE PATIENT

LOC

A & O x4

HEART RATE

128

RR

22

BLOOD PRESSURE

126/86

SKIN

Pink, warm, dry

PUPILS

??? Really?

SPO2

99%

NOTES

His biggest concern is the state of his children and his wife. He states he does not really feel any pain anymore as long as he does not move his eyes.

THE PATIENT

LOC

A/O x4

HEART RATE

122

RR

18

BLOOD PRESSURE

144/102

SKIN

Pale, cool, dry

PUPILS

pearl

SPO2

95%

NOTES

Patient is cooperative but nervous and insists that you do NOT call his wife. His friends are all taking pictures and making TikToks....

THE PATIENT

LOC

HYPER Alert,
Oriented x 4

HEART RATE

132

RR

32

BLOOD PRESSURE

128/94

SKIN

pink, warm, dry

PUPILS

pearl

SPO2

97%

NOTES

Your patient is very upset and crying. He is apprehensive about your arrival and is refusing to leave his mom's lap. He keeps attempting to grab the fork.

THIS.... IS YOUR PATIENT

No worries! All better!

THE PATIENT

LOC

to V, tracks you
no speech

HEART RATE

136

RR

30

BLOOD PRESSURE

No equipment

SKIN

Pale, cool, wet

PUPILS

Constricted

SPO2

No equipment

NOTES

You carry a basic first aid to all practices.
You send an uninjured student to retrieve
it. How do you treat this patient until
it's arrival.

THE PATIENT

LOC

A/O x 4

HEART RATE

116

RR

22

BLOOD PRESSURE

124/82

SKIN

sweaty, flushed

PUPILS

pearl

SPO2

97%

NOTES

Your patient is using words you have never heard before and sounds a lot like Yosemite Sam. Every time he looks at his foot, though, he turns the shade of a paler Marvin the Martian.

THE SCENE

....is safe?

Oh, boy. Screams of "I'm sorry," and "Don't tell Mom" fill the room. The dogs are barking and losing their minds. The two boys in the kitchen are both pretty upset.

Your patient is sitting in a chair, staring at you with eyes like serving platters. He says, "oh, I'm DEFINITELY telling MOM! You're gonna be grounded forever!" Screams of "I didn't mean to, but you moved!" fill the room.

Suddenly, you realize you have been staring as well, with your mouth open, and you're pretty sure you need clean underwear.

THE PATIENT

LOC

A/Ox4, terrified

HEART RATE

142

RR

44

BLOOD PRESSURE

136/94

SKIN

Pale, cool

PUPILS

pearl

SPO2

93%

NOTES

The bamboos torch is approximately 36 inches long, and you know this because it's mate is laying on the ground where the boys had been playing.
