

## JOIN US! Friday-Saturday, March 21-22, 2025

The University of Nebraska Medical Center (UNMC) has a strong history of caring for patients with end-stage organ failure and transplantation as a curative treatment. The unique opportunity for UNMC as a transplant center is the presence of an active clinical program in all forms of solid organ transplant, including heart, lung, liver, kidney, and intestine.

The care and treatment of transplant patients require a multidisciplinary and interprofessional approach. Collaborative innovation in clinical care, as well as research from a foundational, translational, and clinical nature, holds the promise of a positive impact on patient outcomes.

The **2nd Annual UNMC Transplant Symposium** will provide opportunities for internal collaboration and external engagement for the transplant programs at UNMC and Nebraska Medicine and create a framework to lead the world in transforming lives to create a healthy future for all individuals and communities affected by end-stage organ failure.

### KEYNOTE PRESENTER

**Keren Ladin, PhD, MSc**

Associate Professor, Departments of Occupational Therapy and Community Health, School of Arts and Sciences, Tufts University, Medford, MA

### TARGET AUDIENCE

This accredited continuing education activity is designed for **physicians, advanced practice providers, nurses, pharmacists, dietitians, transplant coordinators, fellows, residents, and students in solid organ transplantation.**
