Managing the Clinical Trials Database
Log onto the RSS system by going to the UNMC intranet website > quick links > RSS
Use your UNMC logon
This will be the next screen > choose “Clinical Trials Posting”
Click on “Post Clinical Trials”
Click on the IRB dropdown box and select the appropriate IRB # for the protocol you are trying to enter.
Your protocol will appear here

To aid in your completion of the entry fields below, data for this protocol has been automatically retrieved from clinicaltrials.gov using NCT ID: NCT00405275.

The clinicaltrials.gov data is displayed in the yellow fields below and copied to the appropriate entry fields when applicable.

If NCT00405275 is not the correct clinicaltrials.gov ID number for this protocol, click here.

Title of Research. (in lay terms) available to fill in the information

Because this entry field was blank, the clinicaltrials.gov text below has been automatically pasted into it.

Please edit as necessary.

When filling in any of the boxes the number of characters should be 0-1850. If it becomes a negative number you must make changes in order to bring that into acceptable range. Only 1850 characters will be visible.
Contact.

Save Draft | Submit for approval

Insert the name of the contact person in the search box > GO then click on that name to insert it in the database.

Choose the appropriate medical area(s) of interest.

Save a draft and submit for approval. The IRB administrators will approve it and it will automatically post. If not approved you will be notified.
