Clinical Research Center

Emergency Procedures-Severe Weather: Severe Thunderstorm, Tornado Watch, Tornado Warning

The Clinical Research Center (CRC) staff will follow Nebraska Medicine plan for severe weather (MP-EO01 – Emergency Operations Plan and Yellow Emergency Preparedness Manual).

Definitions

- **Tornado WATCH:** Issued when weather conditions exist that could produce a tornado. A tornado watch may last for several hours.
- **Tornado WARNING:** Issued when a tornado has actually been sighted and is threatening the community. At this time, the outdoor warning sirens are sounded, and the emergency messages are broadcast by the media. A tornado warning usually lasts for 30 minutes or less.
- **Straight-line Winds:** The outdoor warning sirens will be activated when straight-line winds in excess of 80 mph are expected.

Response to Initial Notification

1. Reassure research participants and distribute CRC flashlights.
2. Flashlights are located in the following areas:
 - Clinical Research Unit (UT4)
 - North Treatment Room University Tower (UT4) Room 34102
 - Coordinator's offices Room University Tower (UT4) Room 3488
 - Laboratory University Tower (UT4) Room 3492
 - Eppley Cancer Institute (ECI) Room 2031.1
 - Clinical Research Unit (GCHS) Room 2043
3. Evacuation:
 - a. CRU (UT) to the University Tower first floor via the stairwell located by turning left when exiting the CRU's front door.
 - b. CRC Eppley Cancer Institute (ECI) to the first floor via the stairwell located either east end or west end within the department. Bathrooms on the west end have no windows and would be safer than the hallway.
