

Volunteer Underserved Experiences

You must have five (5) documented experiences where you provided medical services for a defined underserved population. To document these experiences log into OASIS and go to the Graduation Checklist. These experiences can be from any year of medical school, however, they must be experiences outside of your rotation or course requirements. Experiences such as foreign mission trips, UNMC SHARING clinics, and federally designated underserved health centers are great examples of options. It cannot be a service that is a requirement of a core or clinical clerkship. Contact: Paul Paulman, M.D. with eligibility questions.
