Continuing Education
You No Longer Need to Fear the Little People

Dr. Al Burns received his certificate in pediatric dentistry from The Ohio State University and Nationwide Children's Hospital in June 2008. He then became board certified in 2010. His education included advanced studies and specialized training in dentistry for children, adolescents, special needs, and medically compromised patients. His training also focused on sedation, anesthesia dentistry, and interceptive orthodontics. He graduated from the UNMC College of Dentistry in 2001 with academic and clinical services-specializes in prophyaxis and provides dental care treatment at Alligator Dental in Saginaw, Texas, and San Marcos, Texas.

Course Description: While pediatric dentistry has become more and more specialty-driven in many rural and semi-rural areas, specialists can be few and far between. In addition, keeping basic pediatric services in the office may be an incentive and keeps good GP patients in the practice for convenience. Often the biggest challenge to treating children is their behavior and the unknown that comes with the nuances in their treatment planning, which differs from adult care.

Race to the Top: How Digital Wax-ups, 3D-Printing, and CAD/CAM Abutments and Restorations will Take Your Implant Practice to the Next Level

Dr. John Rutledge received his dental degree, completed his residency in periodontics, and received his masters of science degree in oral biology from The Ohio State University. Dr. Rutledge is a board-certified Diplomate of the American Board of Periodontology and a member of the American Academy of Periodontology, American Dental Association, and Northeast Dental Association.

Course Description: Digital implant dentistry offers great benefits to both patients and doctors. With prosthetically driven implant planning utilizing digital software, surgical plan can be preliminarily executed with in-house printed guides. A variety of CAD/CAM abutments and restorations is currently being promoted—some of which can be detrimental to peri-implant health.

Luncheon Speaker
Dan Duncan from UNL’s Innovation Campus
Mr. Dan Duncan is the executive director of Nebraska Innovation Campus. Dan began his tenure with the University of Nebraska-Lincoln in 1987 when he accepted the position of operations manager at the University of Nebraska Panhandle Research and Extension Center in Scottsbluff, Nebraska. In 1991, he was named director of the University of Nebraska-Agricultural Research and Development Center near Mead, Nebraska. In August 2004, Dan was named assistant director of the Agricultural Experimental Station on a part-time basis. In February 2008, Dan accepted the position of assistant dean and director of the University of Nebraska-Lincoln Agricultural Division. In October 2011, he moved into his current position as executive director of the Nebraska Innovation Campus Development Corporation.

Dental Museum
Open: September 6-16, 2017
