

Module 4: The Oral-Systemic Link - Diseases and Oral Implications of the Elderly

Course Objectives:

1. Given a systemic condition, the direct care providers will be able to describe the oral/systemic relationships in the elderly.
2. The direct care providers will be able to recognize abnormal oral conditions and bring it to the attention of the charge nurse and/or dentist.
3. The direct care providers will adapt oral care to accommodate special systemic conditions in the resident.
