

HAZARDOUS MATERIAL FACT SHEET

Commercial (Trade Name) Product Disposal

Commercial products being submitted for disposal must be identified as to their chemical constituents and hazard category before they can be picked up. For this reason, the following steps should be carried out in addition to normal disposal procedures:

- A.** If available, send a Safety Data Sheet (SDS) with the Chemical Collection Tag.
- B.** If a Material Safety Data Sheet is not available, submit the following information on a separate sheet of paper with the Chemical Collection Tag:
 - Product name
 - Ingredient list from the bottle label
 - Description of product's usage
 - Manufacturer/distributor name, address, city, and telephone number
 - Product catalogue number or batch code
 - Approximate age
 - pH (if liquid)
- C.** If none of the above information is accessible, it may be necessary to treat the chemical as an unknown. To evaluate an unknown commercial product, follow the guidelines outlined in the Hazardous Materials Fact Sheet, [Unknown Chemical Disposal](#) and contact the Environmental Health & Safety Office at (402) 559-6356 if questions arise concerning preliminary analysis procedures.
