Improving Human Performance & Effectiveness in Health Care

This month in the Davis Global Center, UNMC faculty, students and iEXCEL staff continued to test and try new ways of adopting simulation and visualization to “bring learning to life!” With many sessions on the schedule, the interprofessional, experiential simulation model for health professions training continues to evolve.

Third Annual iEXCEL Innovation Awards

The Third Annual iEXCEL Innovation Awards were held in February to recognize and celebrate the hard work of UNMC Faculty and Nebraska Medicine Practitioners. The awards highlighted Faculty who utilize iEXCEL resources in innovative new ways in several categories including Academic, Clinical, Impact, Collaborative/IPE, Teaching Technologies, Nebraska Medicine and Student Awards.

Ongoing Operations

Residents from the Department of Orthopaedic Surgery led by *Dr. Justin Siebler* conducted a month-long course to practice complex orthopedic surgical skills. This team utilized the simulated operating room to practice with both synthetic and fresh tissue.

Transitioning from Class to Clinical

College of Allied Health Professions students from both Physical Therapy and Occupational Therapy teamed up for Early Acute Service Experience (EASE) training. Led by *Dr. Tessa Wells*, EASE training prepares students for clinical rotations with patient care equipment management practice and human patient interactions.

Additional Highlights

100,000th Visitor

iEXCEL reached a new milestone this month: 100,000 visitors to the Davis Global Center!

Kelsey Green, a third-year College of Medicine student was the 100,000th visitor when she stepped into the Davis Global Center with her classmates to conduct clinical practice in their OB-GYN rotation.

Let's Connect

Share your experience with iEXCEL and follow us to see innovation in health care training and simulation:

LinkedIn: [iEXCEL at UNMC](#)

Facebook: [@UNMC_iEXCEL1](#)

Twitter: [@UNMC_iEXCEL](#)

Instagram: [@iexcelunmc](#)

Contact us: [Gateway App](#)

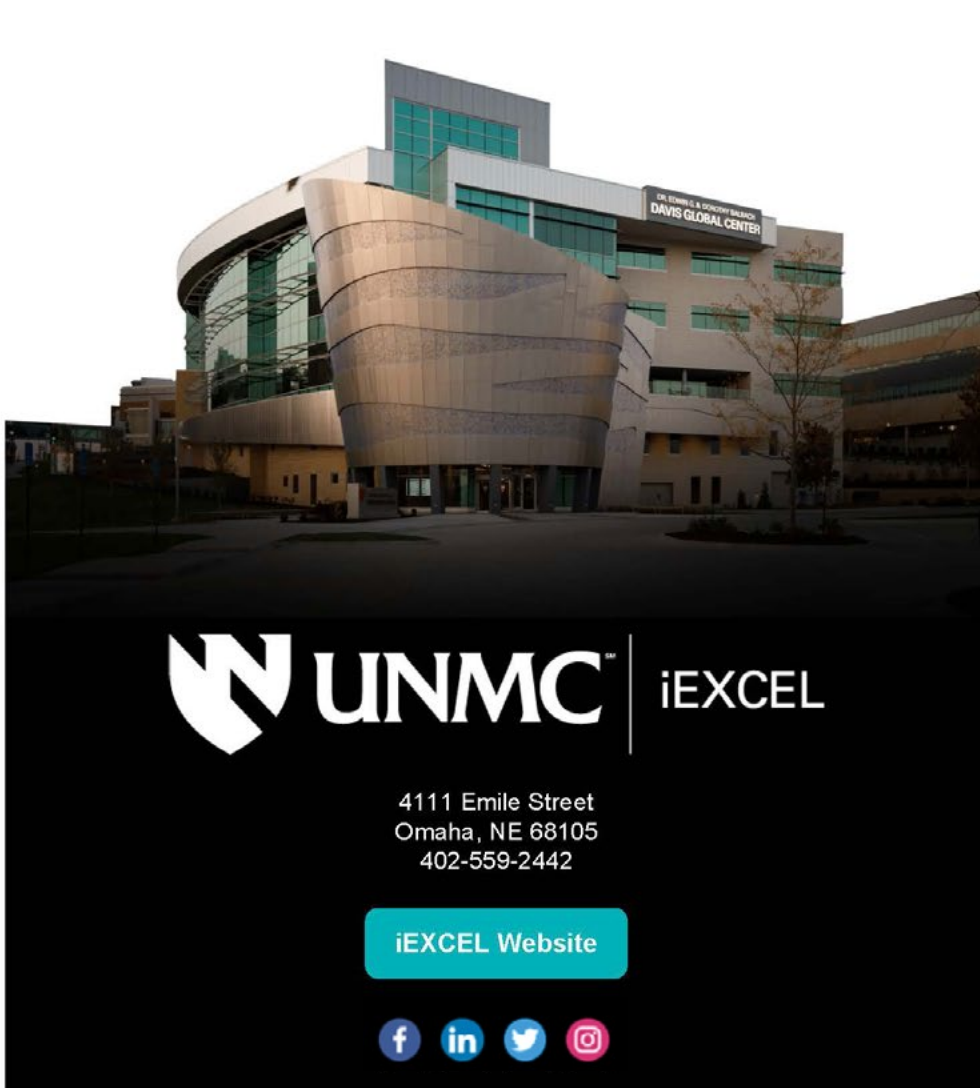

Please continue to reach out to us directly with questions (see the iEXCEL UNMC app) about how to access staff in the Davis Global Center, especially if you would like support from iEXCEL in creating simulation and visualization scenarios.

We look forward to continuing to innovate with you!

Sincere Regards,

Pamela Boyers, PhD
Associate Vice Chancellor, iEXCEL
