iEXCELSM

Welcome Elizabeth Baron!

We are delighted to share that Elizabeth Baron has agreed to serve as *Senior Advisor, Intelligent, Immersive Simulation*, for iEXCEL for a period of 2 years, commencing April 1, 2024, through March 31, 2026.

In a full-time internal consultancy role, Elizabeth will bring her extensive experience from 25 years at Ford Motor Company as Global Lead for Immersive Reality, and more recently with Unity Technologies as Global

Lead for Enterprise Solution Architecture. Elizabeth will maintain her national and global engagements, while she works with iEXCEL to help unify operations and apply new visualization technologies and software to amplify processes and productivity. Elizabeth will also apply her global experience in developing and utilizing intelligent immersive environments to help advance the adoption of Davis Global Center immersive technologies.

The academic mission remains our highest priority, and Elizabeth will collaborate with iEXCEL leadership related to the adoption of innovative technologies and visualization assets created in the Davis Global Center. This includes advising upon statewide outreach efforts to effectively distribute iEXCEL visualization technologies across Nebraska.

As we move into this next phase of development for iEXCEL, we are fortunate to add Elizabeth Baron's significant expertise to help us continue the journey to *Improving Human Performance and Effectiveness in Health Care*. With Elizabeth's extensive experience in deploying immersive simulation technologies based on a holistic digital twin platform, she is a very welcome addition to the iEXCEL team.

Sincerely,
Pam Boyers, Associate Vice Chancellor, Clinical Simulation, iEXCEL
