The Department of Internal Medicine
Summer Undergraduate Research Program

THE PROGRAMS
Applications are invited from undergraduates to the Summer Undergraduate Research Program (SURP) and the Summer Undergraduate Alcohol Research Program (SUARP) in the Department of Internal Medicine at the University of Nebraska Medical Center. Chosen applicants will spend 10 weeks during the summer working on a research project in one of the 10 divisions within the Department of Internal Medicine, generally beginning in late May or early June.

RESEARCH OPPORTUNITIES
The Department of Internal Medicine has research projects which cover a broad range of topics. Areas of study range from basic research to study of human diseases in clinical settings. Students will be selected by the Department on the basis of academic achievement and mutual interest in research areas. Students will interact with faculty members and researchers in the laboratory or clinical settings throughout the project.

More information about research in the Department of Internal Medicine at the University of Nebraska Medical Center can be found at: http://www.unmc.edu and click on Departments, Internal Medicine, and Research.

The College of Medicine holds a Faculty Poster Session in January to showcase a variety of research projects being conducted at the University of Nebraska Medical Center. To find out more about the poster session, contact Sonja Cox, Office of Research and Development at scox@unmc.edu.

HANDS ON EXPERIENCE

APPLICATIONS
Apply online to the Summer Undergraduate Research Program at:
http://www.unmc.edu/student services/surp.htm
Applications open around Thanksgiving and are due March 1.

For more information, contact: Selaba Travis at stravis@unmc.edu.

POSTER SESSION
The program generally culminates with a mandatory poster session where SURP participants’ efforts and findings are presented for faculty, staff, family and peers to view.
