- Long-term lease with expansion options
- 6 data hall phases
- Total of 800 Rack Location Units (RLU)
- Full Sized Loading Dock under Surveillance 24/7
- 400-seat Workgroup Recovery Area

Physical Space

- ~5,000 ft² data hall
- 90 Rack Location Units (RLU)
- 48 RLU Expansion Space
- Zones for Compute, Storage and Network
- 24/7 Security, Surveillance, Access Control
- 24/7 Monitoring & Operations Center
- Remote & Smart Hands

Electrical

- New Utility Service
- New Diesel Generator
- Redundant UPS Protection
- Plans to Double Capacity

Mechanical

- Innovative, In-row Cooling
- Support for High Density Workloads
- High Efficiency System
- Clean Agent Fire Suppression

Physical Security

- Security Procedures exist for access to the CoSentry Facility and the Data Center.
- Card and Smart hand access required for Data Center and all hallways.
- On-Site security monitors all access.

Electronic Tracking

Interior doors have magnetic locks requiring pre-programmed security badges which limit access to all security zones.

Security

24x7 security provided by a third party company. Exterior and interior doors are secured by means of mechanical and/or electronic locking mechanisms.

Video Tracking

Movement within the data center and adjacent hallways is monitored and automatically recorded with DVR system.
