• Pender – Pender Community Hospital
• Scottsbluff – Regional West Medical Center
Back to Basics: Pain Management in Older Adults

Tuesday, January 27, 2009 • Education from 7-9 PM CST (6-8 pm MST)

COURSE DESCRIPTION
Pain management in the older adults is particularly challenging and is frequently under treated. This conference offers a survey-focused overview of the basics of pain management in the elderly, providing evidence-based tips for the pharmacologic and non-pharmacologic approaches to pain management for this population. The team approach to pain management of the elderly patient/client will be emphasized. Tips for caregivers will be included.

LEARNING OBJECTIVES
Upon completion of this presentation, the learner will be better able to:
1. Identify differences between depression, pain and other medical factors in the elderly.
2. Explain key elements of pharmacology approaches for pain management in the elderly.
