

# Want to help children with autism learn & grow?

**UNMC Munroe-Meyer Institute  
is HIRING!**

**Full- & Part-  
Time  
Positions**

## **Become a behavioral therapist!**

Autism services through the University of Nebraska Medical Center's Munroe-Meyer Institute provide applied behavior analysis (ABA) therapy services for children with autism spectrum disorders. MMI autism services is seeking new behavioral therapists. Behavioral therapists teach skills including receptive and expressive language, social interaction, adaptive behavior, self-help skills and academics.

- Ongoing supervision and education in ABA are provided by board-certified behavior analysts (BCBAs).
- Behavioral therapists participate in a 40-hour training to sit for the exam to become a registered behavioral therapist (RBT). There is no cost to participants for the exam.
- Strong applicants are typically undergraduate or graduate students in a related field (e.g., psychology, education, speech-language pathology, physical therapy) with at least one year of prior experience working with young children (ages 2-10).
- Therapists must be able to lift at least 50 pounds, be ambulatory and possess writing abilities on Microsoft.
