

UNMC Neuropsychology Fellowship

Overview

The University of Nebraska Medical Center offers a two-year post-doctoral fellowship in Clinical Neuropsychology under the Department of Neurological Sciences, Neuropsychology division. Training is based on the Houston Conference guidelines for specialty training in clinical neuropsychology. The Clinical Neuropsychology Fellowship Program is designed to fulfill the Nebraska state psychology licensure requirements and to ensure that trainees are prepared for future board certification in clinical neuropsychology. UNMC is a member of the Association of Postdoctoral Programs in Clinical Neuropsychology (APPCN) and participates in the APPCN match.

This fellowship position is located on the hospital's main campus in midtown Omaha, Nebraska. The Neuropsychology division staff includes nine neuropsychologists, six psychometrists, a receptionist, and two neuropsychology fellows (one fellow recruited each year).

Start Date

One adult-focused fellowship position will be available beginning in September 2023.

Length of Program

24 months

Salary

2023: \$49,846

Benefits

- Comprehensive health, dental and vision insurance
- Basic life and disability insurance
- One day of sick leave accrued each month
- Twenty days of paid vacation each year
- Five days of leave with pay for approved professional or educational meetings
- \$2500 professional/conference fund (could be subject to change each year)

Clinical Training

Training is based on the Houston Conference guidelines for specialty training in clinical neuropsychology. Fellows will receive a minimum of two hours per week of individual face-to-face supervision with a clinical neuropsychologist. Fellows will have 4 primary major clinical concentrations (6 month rotations), which will account for 60 to 75% of fellowship activities.

- Rotation 1: Pre-neurosurgical evaluations (epilepsy, Wada, pre-DBS evaluations)
- Rotation 2: Memory and movement disorders
- Rotation 3: General neurology (CNS tumors, stroke, MS, TBI, etc.)
- Rotation 4: General medical (solid organ transplant, psychiatry referrals, etc.)

Research Opportunities

The program emphasizes clinical training with opportunity for clinical research. Research activities are typically accomplished within existing clinical research programs, with the expectation that the fellow will co-author at least one paper or poster during their two year tenure.

Didactic Training Opportunities

Fellows will be expected to attend and participate in neuropsychology didactics including weekly neuropsychology seminar, monthly journal club, and a monthly group supervision series (boards prep, case conferences, professional development discussions). There are opportunities for additional educational programming offered through neurology and neurosciences, psychology, psychiatry, and neurosurgery.

About UNMC and Nebraska Medicine

The University of Nebraska Medical Center has six colleges, two institutes and a graduate studies program, serving nearly 4,000 students in more than two dozen programs.

Nebraska Medicine (NEMed) is the primary teaching partner for UNMC. NEMed includes two highly respected hospitals (main Omaha campus and Bellevue campus), as well as approximately 40 specialty and primary care clinics in Omaha and surrounding areas. We have an international reputation for solid organ and bone marrow transplantation services, and we are a leader in oncology, cardiology, and neurology services. NEMed employs over 8,000 employees and has a medical staff of more than 1,000 students each year, as well as more than 350 medical and surgical fellows. U.S. News and World Report named NEMed as one of the nation's best hospitals in eight medical specialties including neurology and neurosurgery.

About Omaha

Omaha is consistently ranked one of the three best cities to live in the U.S. Our cost of living is well below the national average, and our residents enjoy affordable housing, great public schools, a thriving economy, short commutes, and a low crime rate.

Omaha is also a fun place to live. We have a four-season climate, a thriving indie music scene, great restaurants, and enough cultural, sports, outdoors, and arts and entertainment activities to suit almost any tastes. Omaha is the home of the NCAA College World Series, the world-class Henry Doorly Zoo, the Omaha Performing Arts Holland Center, the Lauritzen Gardens Botanical Center, and numerous parks, trails, museums and theaters.

How To Apply:

UNMC/Nebraska Medicine is a member of the Association of Postdoctoral Programs in Clinical Neuropsychology (APPCN) and participates in the APPCN match. To be considered for the Postdoctoral Fellowship in Clinical Neuropsychology, applicants must have completed an APA/CPA-accredited doctoral program and an APA/CPA accredited internship. The following materials are required to be submitted no later than **Friday, December 30, 2022**.

- A letter of application outlining specific training and eventual professional goals, as well as the status of your dissertation
- Curriculum vitae describing background training and experience, including a description of internship and other scholarly activities and research
- Two sample de-identified neuropsychological evaluation reports
- Three letters of recommendation, at least one from an internship supervisor (*letters should be emailed directly from the supervisor*)
- Copies of graduate transcripts
- Verification of Completion of Doctorate (to be completed by Dissertation Chair or Director of Clinical Training):
