UNMC College of Nursing

[Link to Building Codes](#)

Feature	Definition
Web-Conferencing	Software based live meeting capabilities such as Zoom, Teams, Webex, etc. Technologies include both microphones and camera(s) integrated into the local computer.
Echo360 Recording Audience	Lecture capture capabilities that enable ability to record local presentations
Main Display - Dual	Two or more visual reinforcements mounted on the primary focus wall. Technologies may include large television monitors or projectors. Capability is typically associated with the ability to project extended desktop.
Audience Main - Single	One visual reinforcement mounted on the primary focus wall. Technologies may include large television monitors or projectors.
Audience Mic. - Ceiling	Microphone array installed within the ceiling. Hands-free technology typically used to capture broad areas of the room
Audience Mic. - Soundbar	All-in-one conferencing soundbar typically installed under primary focus wall display. Most commonly installed within conference rooms.
Audience Mic. - Desktop	Microphone positioned directly in front of participant. Promotes the ability to mute/unmute microphone on demand. Technologies may include both wired and wireless options.
Presenter Display - Single	One auxiliary monitor that enables presenter to view materials. The monitor is typically located at a podium or other dedicated teaching station.
Presenter Display - Dual	Two auxiliary monitors that enable presenter to view materials. The monitors are typically located at a podium or other dedicated teaching station.
Presenter Display - Confidence	One or more supplemental large displays located within view of the presenter. These displays reinforce presentation materials and empower presenter to step away from podium and interactive with audience.
Presenter Mic. Gooseneck	Wired Microphone typically located at the podium or other dedicated teaching station
Presenter Mic. - Wireless Lapel	Wireless wearable microphone that promotes movement away from the podium.
