

International Projects/Travel Questionnaire

Rationale and submission instructions: To protect and help faculty and staff traveling internationally or working with international groups, please complete the following questionnaire. This is required to receive approval for international travel. **This form needs to be completed before International Travel is approved (or tickets are purchased) and for International Sponsored Projects, at least 2 weeks before the application deadline. Where to submit your completed form:**

- For a research contract or grant application: return with that application to Sponsored Programs
- For travel or other international service/business agreements: return to Business and Finance
- For any international Material Transfer Agreement request: submit to the person you are working with in UNeMed.

General information/restrictions regarding international projects and travel.

Indirect costs for Sponsored Projects with international components: Apply the appropriate UNMC Federally-negotiated F&A rate, unless dictated otherwise by sponsor guidelines restrictions. For projects using a non-standard F&A rate for the type of funding requested, a formal request using the UNMC F&A Waiver Form must be submitted to Sponsored Programs Administration for VCR approval. The UNMC F&A Waiver Form is located at http://www.unmc.edu/spa/index.cfm?L1_ID=8&CONREF=97).

Travel restrictions: The State Department maintains a web site to inform you about potential travel restrictions, http://travel.state.gov/travel/travel_1744.html

Export control. UNMC screens all international activities for current regulations, laws and information regarding use of technologies, collaborators, and employers of collaborators in the country proposed.

Laptop technology restrictions. While mobile electronic devices such as laptops, cell phones, and tablets have become part of our day to day life, when taken abroad they can be successfully attacked with malware and other automated attack tools, even when kept current with security software. For this reason and others, when you travel to Cuba, Iran, N Korea, Sudan or Syria, you may only use a “clean laptop”. A “clean” laptop is a device which has a new image installed. Other countries where a clean laptop would be recommended for export controls would be the D-1 (national security level countries): Albania, Armenia, Azerbaijan, Belarus, Cambodia, China, Georgia, Iraq, Kazakhstan, Kyrgyzstan, Laos, Libya, Macau, Moldova, Mongolia, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan, and Vietnam.

Availability of loaner laptops: A loaner laptop or mobile device can be obtained from International Health and Medical Education (IHME) for any travel and should be used for travel to any of the above countries. If you do not plan to use a loaner device when you travel, ensure that all operating system security updates have been applied including current anti-virus, anti-spyware and firewall software is installed. Any laptop or other mobile devices should also have a strong password applied.

Encryption of devices. Encryption laws vary from country to country. To determine your destination’s current laws regarding cryptography, please visit <http://www.cryptolaw.org/> for information specific to the country you are visiting. China, in particular, does not allow encrypted devices into their country. If legally permitted, you should consider encrypting the hard drive of your device.

Preparing for travel: back-up your files, have strong password, and request remote access. Before you leave, it is good practice to have a recent back-up all your files on network storage, in part, so you can securely access them via VPN when traveling. To request secure VPN access, if you do not already have, go to <https://net.unmc.edu/netid/accountrequestremote.php>

Maintaining information security while traveling and upon your return. Plan to lock up your electronic devices when they are not in your sight. Delete any newly downloaded data from your device prior to leaving your electronics unattended. Do not connect to any unsecured Wi-Fi hotspots in the country you are visiting. Only access UNMC data via VPN. Upon returning home, contact your IT support person to ensure that all electronic device are completely wiped and change any password used on your trip For any questions, contact Lisa K. Bazis, [UNMC Information Security Office](#)
