2014

2014 International Conference on Gram-Positive Pathogens

We held our fifth International Conference on Gram-Positive Pathogens (ICG+P) meeting in Omaha, NE.

2013

Preventing the Spread of Staph

Recommendations from a UNMC CSR expert. View the video on KMTV Omaha's [website](#).

See how infection can end an athlete's season early

CSR scientists at UNMC are working to crack a staph infection, but say that the bacteria are everywhere. See full story at [KETV](#).

UNMC develops mutant library for researchers of staph infections

CSR scientists have developed a library of more than 2,000 mutant strains of the *Staphylococcus aureus* bacteria. Read the [UNMC Today story](#) or the full article in the [mBio](#), the journal of the American Society for Microbiology.

2013 Distinguished Scientist

Dong Wang, Ph.D., has been named as one of UNMC's distinguished scientists for 2013. [Read more](#) about Dr. Wang and his professional and personal interests.

2012

2012 International Conference on Gram-Positive Pathogens

We held our fourth International Conference on Gram-Positive Pathogens (ICG+P) meeting in Omaha, NE.

2011

Modeling cellular communication in the brain to discover novel treatments for staphylococcal brain infections

Pathogenic bacteria, such as *Staphylococcus aureus*, and their byproducts activate the host's immune response upon infection. The host's inflammatory immune response can be of particular concern, especially when the infection occurs in the brain. Dr. Tammy Kielian and her team have developed a model to understand the effects this inflammation has on normal brain cell activities after a staph infection has started. Their article can be viewed in the [Journal of Neuroscience](#).

2010

Meet UNMC Distinguished Scientist Tammy Kielian, Ph.D. ([UNMC Today, March 15, 2010](#))

One-of-a-kind staph center approved by regents. ([UNMC Today, April 20th 2010](#))

UNMC creates center to research staph infections. ([Lincoln Journal Star, April 23rd 2010](#))

2010 International Conference on Gram-Positive Pathogens

We held our third International Conference on Gram-Positive Pathogens (ICG+P) meeting in Omaha, NE.

2009

UNMC staph team lands \$11.1 million grant. ([UNMC Today, July 15th 2009](#))
