Clinic Information

The Grand Island Clinic is the only Pediatric Clinic in Grand Island, Nebraska, and has seven pediatricians. We see patients from newborn up through 18 years of age. Many of our patients have special needs and have unique problems and concerns that we deal with on a daily basis. The students see patients prior to the doctors. We have a multinational clientele, with many of our patients speaking Spanish. The usual time in the clinic is from 9AM to 6PM.

We also see numerous patients in the hospital. St. Francis Medical Center has a Level II nursery for which we are the providers. We see all the patients in the hospital and the students will be making rounds both before and after clinic hours for these inpatients.

The pediatric rotation in Grand Island is dynamic and busy. The students will be rotating with all of the physicians. We have had students for many years and they become part of the health care team while they are in our clinic.

When you arrive, you need to go to the Quality Management Department at 8:30 AM your first day. You will be oriented there, which takes about 90 minutes. The contact for orientation is Deb Foight (d.foight@sfmc-gi.org).

Directions

Take Highway 34/281 north off of I-80 to Faidley Avenue. Turn right on Faidley and go to the intersection of Faidley and Custer. The office is located among a number of office buildings and you will find the office at the northeast corner of Custer and Faidley (the office is located one block east of St. Francis Medical Center).
