Electives

The following electives are offered throughout the 3 years of residency. Residents have time to complete 10 of them. There are electives that the ACGME consider to be core electives and residents are required to take 4 of the 13 offered. In addition to the electives listed below, residents may choose to do an away rotation or design their own elective with permission from the Program Director. Further information on these electives can be found in the Rotation Descriptions.
