Training Sites

Children’s Hospital & Medical Center
Children’s Hospital and Medical Center is a private free-standing children’s hospital located just 3.4 miles west of the University of Nebraska Medical Center. It has 143 beds and yearly admissions over 7,000. Children’s Hospital treats children with a variety of secondary and tertiary pediatric conditions. Children’s medical staff consists of general pediatricians in private practice, as well as pediatricians and subspecialists from both university facilities. Residents spend 9 months on the general wards, 2 months in the PICU, and 3 months in the ED during their 3 years of training. Additionally, many electives have clinics and consults at Children’s Hospital.

Creighton University Medical Center
Creighton University Medical Center is a privately owned hospital 1.4 miles east of the University of Nebraska Medical Center. The hospital is recognized for its efforts in cardiology, hereditary cancer and bone metabolism research as well as for its tradition of community service. Residents spend 1 month in the Creighton Pediatric Clinic. Several electives also have clinics and/or consults at Creighton University Medical Center.

Creighton University Medical Center is affiliated with Creighton University, a private liberal arts university which includes the professional schools of medicine, nursing, pharmacy, allied health, and dentistry. It is also affiliated with Boys Town National Research Hospital. Many students from Creighton University’s School of Medicine rotate at Children’s Hospital during their pediatric clerkship.

University of Nebraska Medical Center
The University of Nebraska Medical Center is the professional school branch of the University of Nebraska system. UNMC includes the colleges of medicine, nursing, pharmacy, public health, allied health programs, and dentistry. A rehabilitation institute and cancer research institute are additional features on this campus. UNMC is affiliated with the Nebraska Medical Center which is comprised of Clarkson and University Hospitals, two regionally recognized tertiary care centers. These centers are known world-wide for their efforts in solid organ and bone marrow transplantation, cardiology, oncology, high-risk obstetrics, neonatology, genetics and human nutrition.

Many students from the University of Nebraska, School of Medicine rotate at Children’s Hospital during their pediatric clerkship. Residents spend 2 months on the Inpatient Wards, 2 months in the NICU, and 1 month in the Pediatric Clinic during their 3 years of training. Additionally, many of the other rotations and electives have clinics and consults at the University of Nebraska Medical Center.
