Synopsis:

- Discovery of the clinically approved Antimalarial drug OZ277 (Arterolane).
- Antimalarial drug OZ439 (Artefenomel) in Phase IIb clinical trials.
- BMX-001 compound in clinical trial for numerous cancers.
- American Chemical Society Award for Creative Innovation.
- NSF CAREER awardee.
- Sustained NIH, DOD and NSF funding.
- High number of patent applications.

- One editorial board member of the Journal of Medicinal Chemistry.
- Two members of National ACS Medicinal Chemistry Division committees.
