

Cellular and Integrative Physiology Recruitment Opportunity

Position link: <https://unmc.peopleadmin.com/postings/62594>

The Department of Cellular and Integrative Physiology (CIP) at the University of Nebraska Medical Center (UNMC) invites applicants for tenure track Assistant, Associate, and Full Professor positions. We seek individuals with an outstanding record of productivity and with emerging or established extramurally funded research programs that complement the expertise of current faculty. Successful candidates will be expected to conduct both independent and collaborative research, as well as to participate in the educational mission of the department by teaching medical, allied health, and/or graduate students.

The successful applicants will receive competitive salary and start-up packages, including significant laboratory space and access to an accredited animal facility as well as multiple other [research core facilities](#) (transgenic animal, genomic, bioinformatics, proteomics, imaging, flow cytometry, etc.). These facilities are housed in state-of-the-art buildings devoted to research and positioned within a block of each other on campus.

The CIP department is recognized internationally for its expertise in cardiovascular, neural and renal physiology (<https://www.unmc.edu/physiology/>). The department offers a supportive environment for mentoring and career development of junior faculty. CIP faculty also benefit from the presence of [multiple inter-disciplinary research centers and programs on campus](#), providing additional opportunities for collaborations among basic science and clinical investigators.

As Nebraska's only public academic medical center, UNMC leads the world in transforming lives and communities for a healthier future (www.unmc.edu). UNMC attracts more than \$163 million in extramural research dollars annually and, together with its clinical partner Nebraska Medicine, has a \$4.8 billion economic impact annually on the state. The main campus is located in the city of Omaha (metro area population ~1M), often included in listings of best places to live and work due to its low cost of living, job market, safety, outstanding public schools, and recreational opportunities (www.visitomaha.com).

Actively seeking candidates whose teaching, research, scholarship, or service contribute to our commitment to diversity, equity, and inclusion.

Paras Kumar Mishra, PhD, FAHA, FCVS
Chair, Department Recruitment Committee
