

# SAFETY IN AGRICULTURE FOR YOUTH NATIONAL CLEARINGHOUSE

<https://ag-safety.extension.org/say>

## What is SAY?

The Safety in Agriculture for Youth (SAY) Project provides a clearinghouse for agricultural safety and health curriculum and resources for those who teach youth.

## What does it include?

The SAY National Clearinghouse consists of two different types of educational products:

1. Formal curricula - includes learning objectives and evaluation.
2. Supporting resources - materials that support formal curricula.

## How do I know what each resource is about?

The clearinghouse shows the alignment of each resource to the Agriculture, Food, and Natural Resources (AFNR) Career Cluster Content Standards related to agricultural safety and health. You can easily see what each resources addresses before you access it.
