

Farm Safety - Tractor Safety

Farm Safety Tractor Safety

- A farmer should know their tractor better than anyone else
- Hazards can occur pre-operation, during operation, and during transportation
- Avoid wearing loose fitting clothes that could get caught in the machinery
- Make sure your tractor has a rollover protective structure to prevent injury in the case of a rollover
- Be alert while driving and keep an eye out for people, livestock, cars, and dangerous terrain
- Always wear a seatbelt
- Drive slow to maintain control of the tractor
- Have a slow moving vehicle sign on the back of your tractor so it is visible to others

Preventing Injuries

Watch for others
while driving

Have a slow moving
vehicle sign on the tractor

Use a rollover protective
structure
