Dr. Jeff Bender is a Professor in the School of Public Health and an adjunct professor in the College of Veterinary Medicine. He is currently the Director for the NIOSH funded Upper Midwest Agriculture Safety and Health Center (UMASH), a Center focused on improving the health of agriculture workers and their families. His primary teaching and research interests include infection prevention, disease surveillance, emerging zoonotic diseases, occupational safety, food safety and antimicrobial resistance.

Objectives:

1. Identify zoonotic disease hazards working with livestock and poultry.
2. Propose strategies to reduce disease transmission to farm workers and farm families.
3. Identify needlestick injury risks for livestock and poultry workers.
