Scholarly Communications Librarian
McGoogan Health Sciences Library

Jess King, MLIS
Assistant Professor
Education and Research Services
Librarian

Join us for the newest presentation in the College of Public Health's graduate student research series! Dive into the dynamic realms of open access and predatory publishing as we explore the fundamental principles and practical implications of these topics. In this session, we'll embark on a journey through the landscape of scholarly communication, shedding light on the power of open access publishing and its myriad benefits for researchers, institutions, and society at large. Learn how open access can amplify the visibility and impact of your research while fostering greater collaboration and knowledge exchange within the academic community. But beware of the lurking dangers of predatory publishing! Gain valuable insights into the deceptive tactics employed by predatory publishers and uncover the red flags that signal potential risks to your scholarly integrity. Discover strategies for identifying reputable publishers and journals and arm yourself with the tools needed to navigate the complex terrain of academic publishing with confidence and discernment. Whether you're a seasoned researcher with multiple publications or just embarking on your scholarly journey, this presentation will equip you with the knowledge and resources needed to navigate the ever-evolving landscape of academic publishing!
