# Public Health Accreditation Standards

DOMAIN 2 INCLUDES <b>TWO</b> STANDARDS		
<b>Standard 2.1:</b>		Anticipate, prevent, and mitigate health threats through surveillance and investigation of health problems and environmental hazards.
<b>Standard 2.2:</b>		Prepare for and respond to emergencies.
FOUNDATIONAL CAPABILITY MEASURES:		
<b>Assessment &amp; Surveillance</b>	<b>2.1.1 A:</b>	Maintain and improve surveillance systems.
	<b>2.1.2 A:</b>	Ensure 24/7 access to resources for rapid detection, investigation, containment, and mitigation of health problems and environmental hazards.
<b>Communications</b>	<b>2.2.5 A:</b>	Maintain a risk communication plan and a process for urgent 24/7 communications with response partners.
<b>Emergency Preparedness &amp; Response</b>	<b>2.2.1 A:</b>	Maintain a public health emergency operations plan (EOP).
	<b>2.2.2 A:</b>	Ensure continuity of operations during response.
	<b>2.2.7 A:</b>	Conduct exercises and use After Action Reports (AARs) to improve preparedness and response.

Public Health Accreditation Board

<https://phaboard.org/>

# America's Environmental Health Gap

- Pew Environmental Health Commission (2000)
- Little information was routinely collected on non-infectious disease and human exposures
- Environmental hazard data and monitoring conducted for regulatory purposes, not public health

Pew EH Commission Report: <https://www.jhsph.edu/research/centers-and-institutes/center-for-excellence-in-environmental-health-tracking/pewcompanionreport.pdf>

Recommended a  
“Nationwide Health  
Tracking Network for  
diseases and exposures”

Pew EH Commission Report: <https://www.jhsph.edu/research/centers-and-institutes/center-for-excellence-in-environmental-health-tracking/pewcompanionreport.pdf>

# CDC Environmental Public Health Tracking

Created in 2002 in response to Pew Commission report

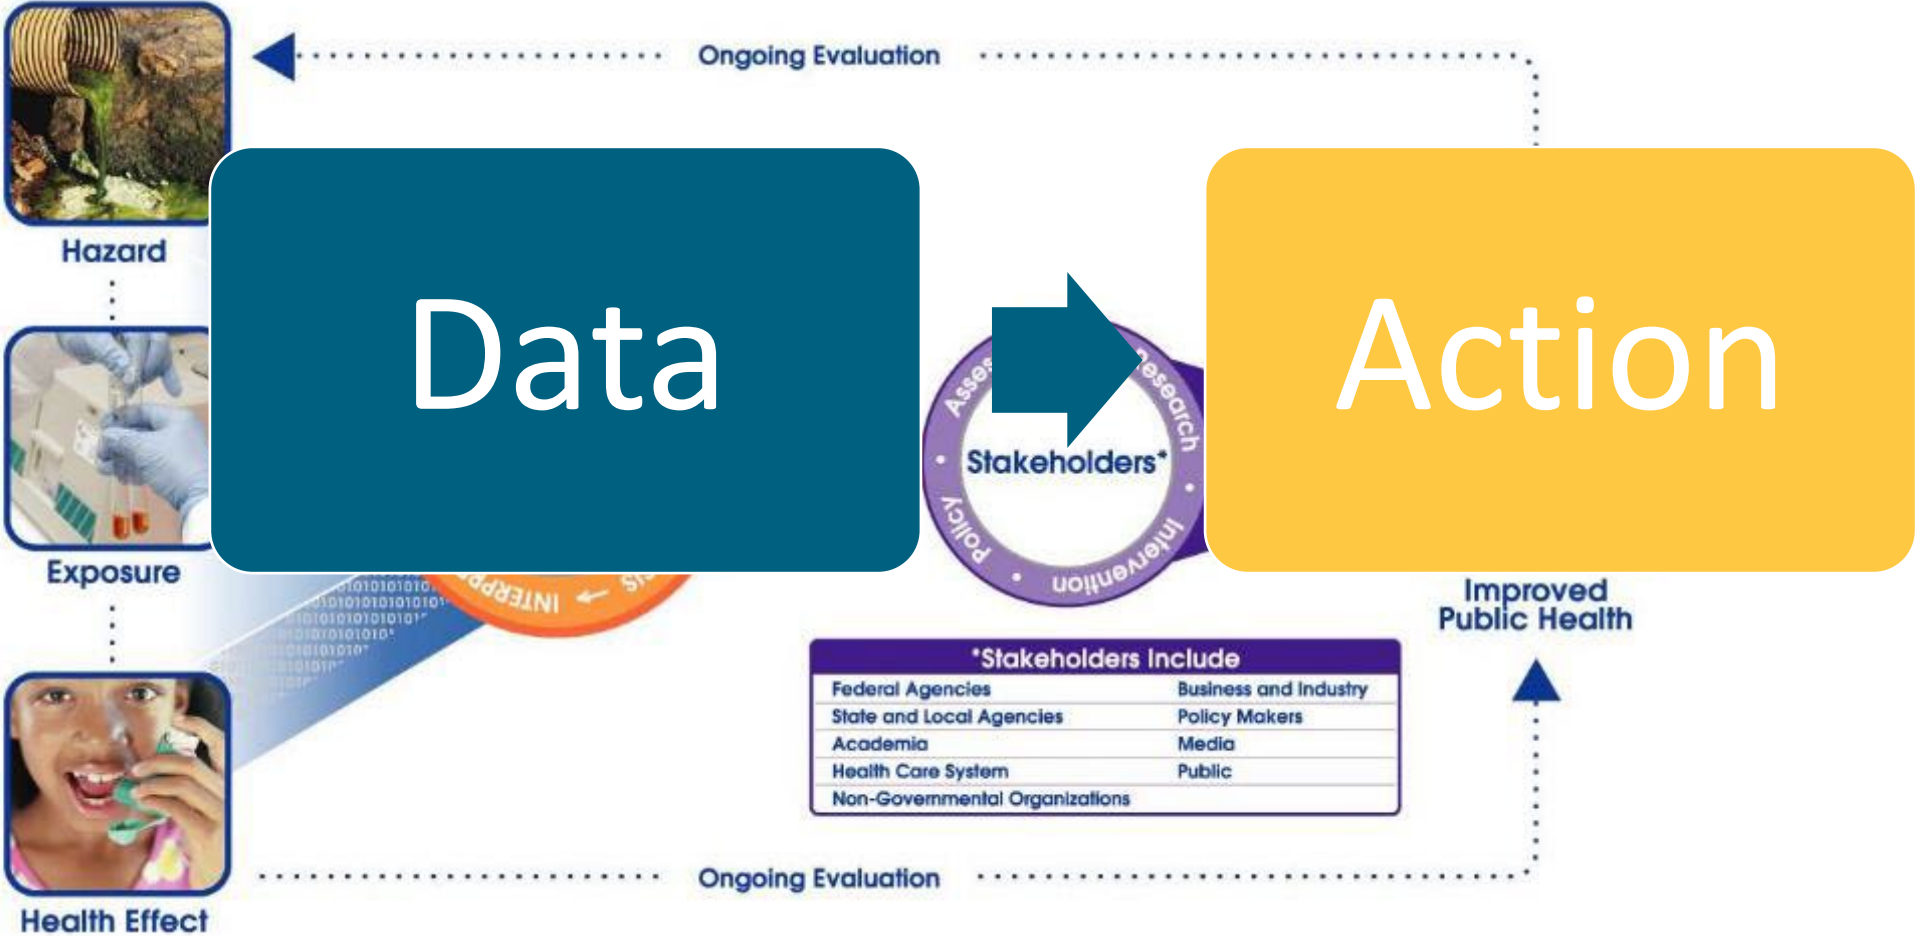

## Vision

- Healthy informed communities

## Mission

- To provide information from a nationwide network of integrated health and environmental data that drives actions to improve the health of communities

# CDC Tracking Model

ENVIRONMENTAL PUBLIC HEALTH

**TRACKING**

# CONNECTS ENVIRONMENT & HEALTH INFORMATION

Check out CDC's data explorer and state and local tracking programs for more information.

## Environmental

Radon  
Drought  
Sunlight & UV  
Wildfire Smoke

- Air Quality
- Extreme Heat
- Drinking Water
- Flood Vulnerability
- Community Design

Pesticide Exposures •  
Toxic Substance Releases •  
Other Environmental Chemicals •

## Exposures

## Health Effects

- Asthma
- Cancer
- Heart Disease
- Heat Stress Illness
- Childhood Lead Poisoning
- Developmental Disabilities
- Carbon Monoxide Poisoning
- Reproductive and Birth Outcomes

## Population Characteristics

Lifestyle Risk Factors •  
Socioeconomics •  
Demographics •  
Vulnerabilities •

# Tracking Public Health Actions

**Target  
prevention  
activities**

**Monitor  
community  
health**

**Identify  
communities  
at risk**

**Support  
epidemiologic  
studies**

**Educate  
residents**

**Inform city or  
state planning**

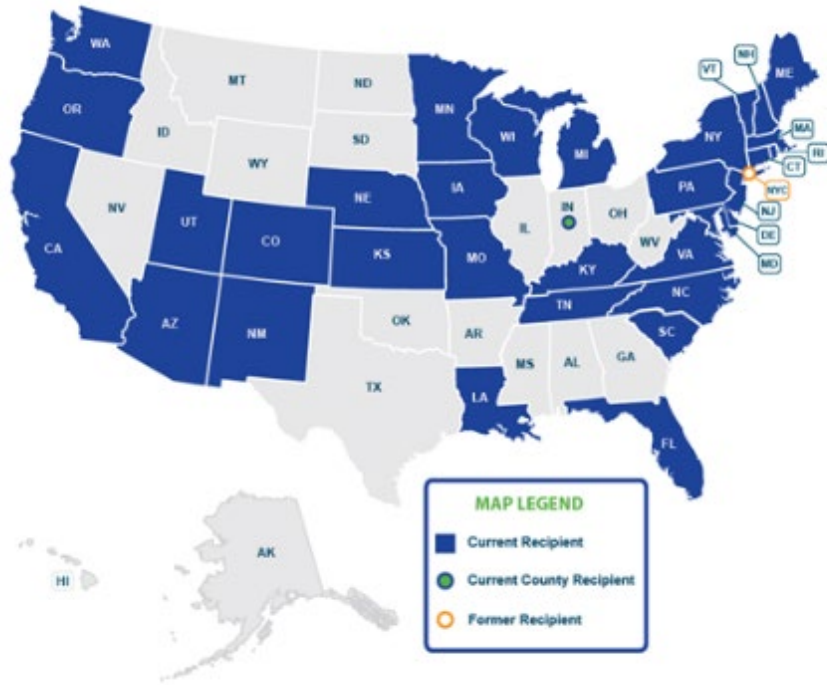

**Inform health  
policies**

# Nebraska Tracking Program

# Nebraska Tracking

August 2022

- Nebraska Environmental Public Health Tracking (EPHT)
- 5-year grant (2022-2027)
- Partners and Stakeholders
  - Water, Climate and Health Program at UNMC College of Public Health
  - Data Stewards (i.e. NDEE)
  - LHDs
  - Community Organizations
  - Public

# Tracking Strategies and Outcomes

## Surveillance

- Increased monitoring of environmental health topics
- Increased EH data quality
- Increased surveillance EH disparities

## Information Technology

- Improved IT, tools, and systems

## Partnerships

- Increase stakeholders data sharing, communication, and response
- Collaboration with stakeholders to reduce disparities

## Outreach/ Communication

- Dissemination of EH information

## Program Capacity

- Increased knowledge and ability among EH workforce
- Increased capacity to provide Technical Assistance for PH interventions

## Evaluation

- Increased completeness, timeliness and quality of evaluation data

# Tracking Data Measures

## Air Quality

- Ozone, PM 2.5

## Asthma

- ED and Hospitalizations

## Birth Defects

- Prevalence

## Cancer

- Incidence (Registry)
- Mesothelioma, melanoma, breast cancer, bladder cancer, leukemia, others

## CO Poisoning

- Mortality
- ED Visits & Hospital visits

## Childhood Lead Poisoning

- BLL data

## COPD

- ED and Hospitalizations

## Drinking Water Quality

- Nitrates, DBPs, arsenic, others

## Heat Illness

- ED and Hospitalizations

## Heart Attacks

- Hospitalizations (HDD)

## Radon

- Testing data

## Reproductive & Birth Outcomes

- Mortality (birth registry)

NCDMs: [https://www.cdc.gov/nceh/tracking/pdfs/ncdm\\_requirements\\_april2017.pdf](https://www.cdc.gov/nceh/tracking/pdfs/ncdm_requirements_april2017.pdf)

# Nebraska Tracking Data Portal

## What is Environmental Public Health Tracking?

Nebraska Environmental Public Health Tracking, or Nebraska Tracking, is a new program in partnership with the Centers for Disease Control and Prevention (CDC). Nebraska Tracking works to explore the connection between health and the environment.

# Community Panels and Priorities

# Advisory Panels (CAP)

- ❑ Community Advisory Panel (CAP)
  - ❑ Aid in the selection of environmental public health priorities
  - ❑ Foster the development of community partnerships
  - ❑ Identify differences in community or regional needs and gaps in resources
  - ❑ Ascertain potential actions to reduce environmentally-related health disparities

# March 27<sup>th</sup> CAP Meeting Summary

- Lack of resources and local volunteers for emergency response to floods, fire, droughts.
- Lack of awareness regarding hazardous materials transported across the State (rail, road, etc.).
- Older housing stock hazards, greater impacts following emergencies, solutions for mitigation & remediation, lack of codes and codes enforcement.
- Air and water quality.
- Lack of (air monitors) or poor infrastructure (water systems) and resources to remedy these issues.
- Lack of transportation for healthcare, mental health services, and food access; especially for elderly populations.
- Several Others

# Tracking in Action

# Florida Tracking

- Funded since 2003
- Non-standard activities
  - GIS support for outbreak investigations (Zika, Dengue, etc.)
  - NASA-funded research project related to extreme heat
  - Emergency response activities (post-hurricane, flood)
- Unique data
  - Built environment
  - Dog bites
  - Occupational health and safety
  - Life expectancy

# Public Health Actions

33 74.922  
**As**  
Arsenic  
[Ar] 3d<sup>10</sup>4s<sup>2</sup>4p<sup>3</sup>  
Metalloid

Arsenic Biomonitoring Project

Flooding Health Impact Assessment

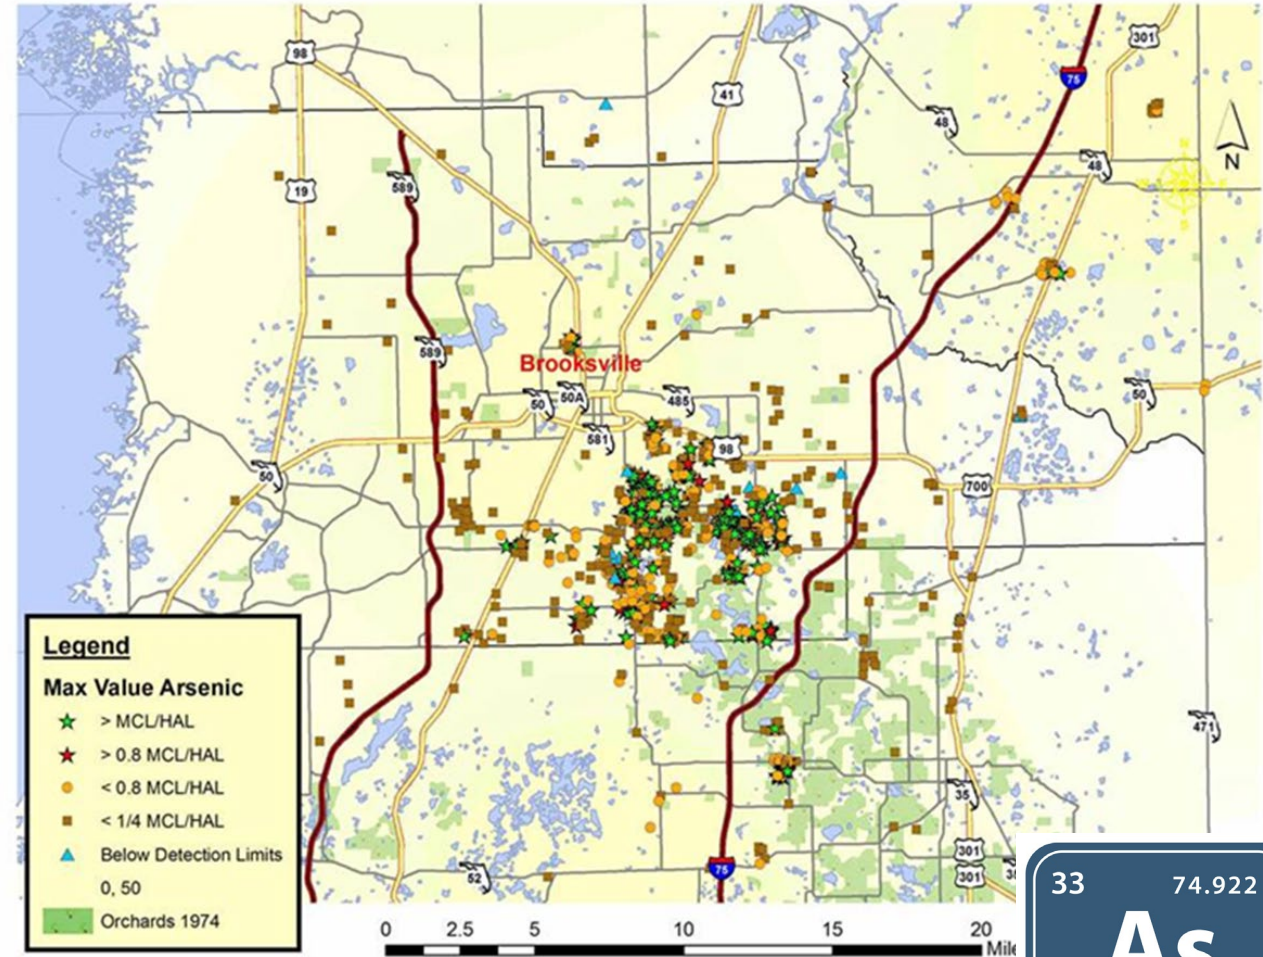

Post-Hurricane CASPER

# Arsenic Biomonitoring Project

- Types of arsenic: organic and inorganic
- EPA Maximum Contaminant Limit (MCL) is  $10\mu\text{g/L}$
- Elevated arsenic found in 32% of private wells sampled in Hernando County, FL
- Supported the Safe Water Restoration Program

33 74.922

**As**

Arsenic

[Ar]  $3d^{10}4s^24p^3$

Metalloid

# Objectives and Methods

## Objectives

- Measure the amount of arsenic in tap water
- Measure individual short-term arsenic exposure
- Determine the relative importance of dietary and water sources of arsenic in study population

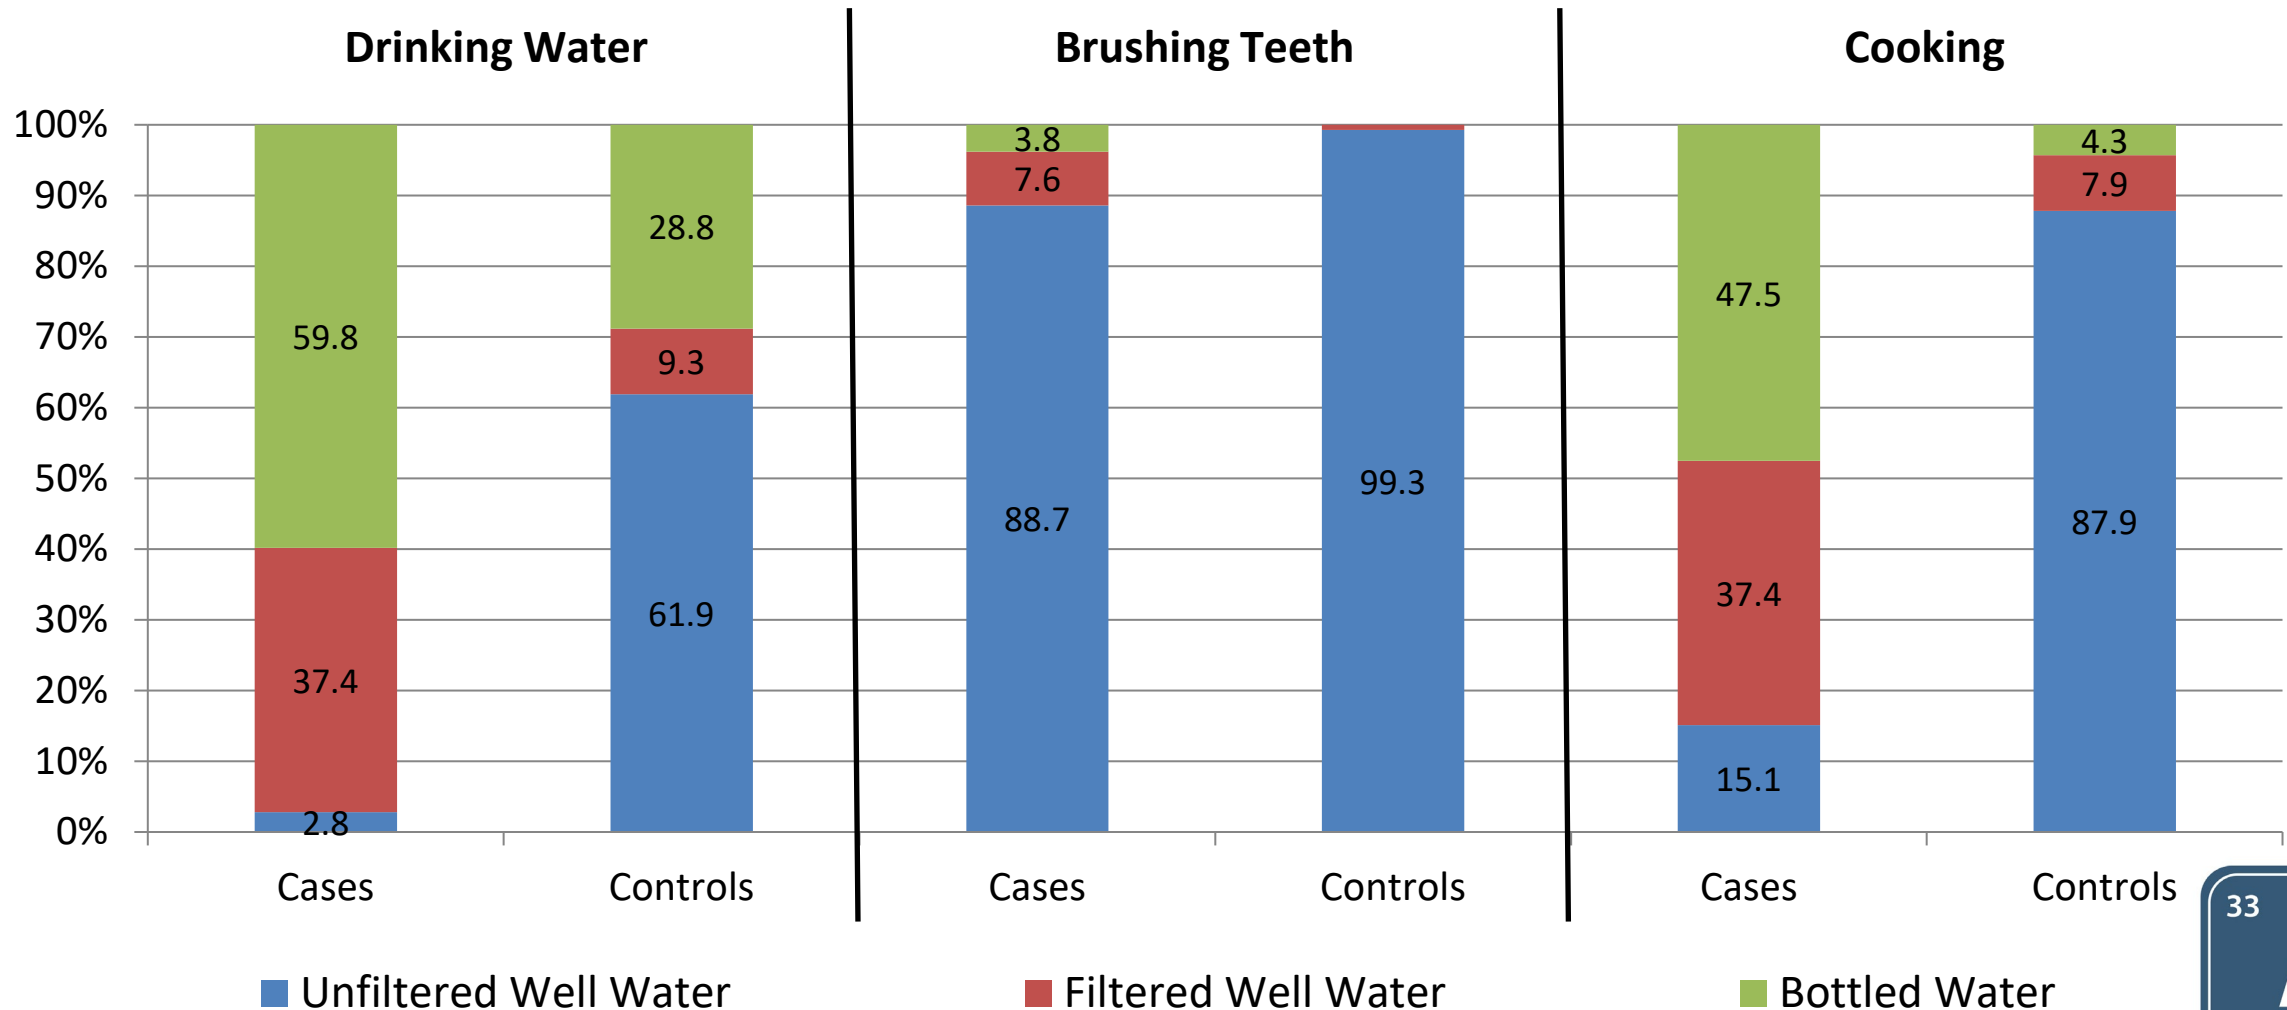

## Methods

- Water and urine sampling
- Questionnaire on home water use, dietary exposures, pesticide and herbicide use, tobacco and alcohol use, occupational risk
- “Case” households ( $>10\mu\text{g/L}$ ) compared to “control” households ( $<8\mu\text{g/L}$ )

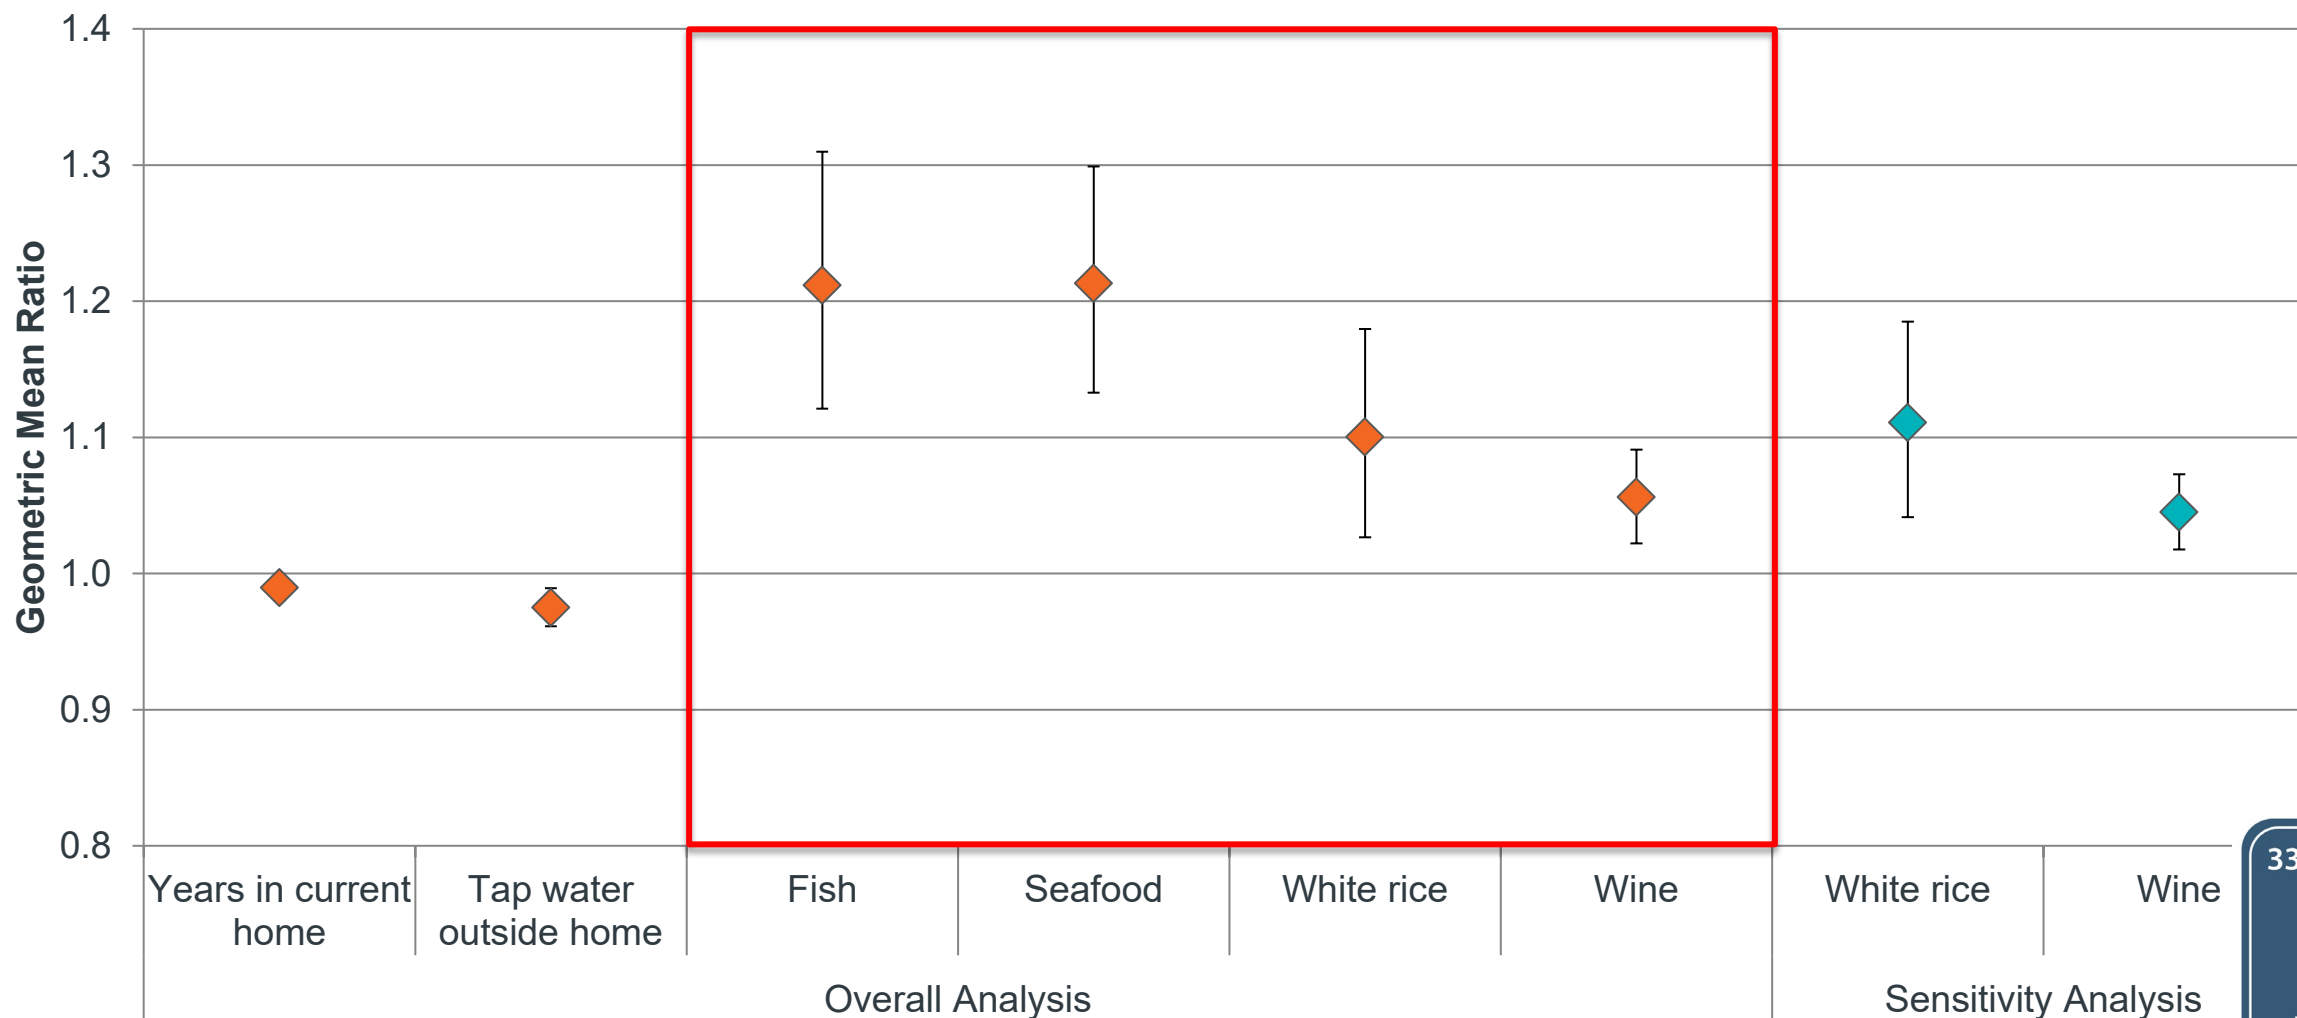

# Results: Main Sources of Water Usage

33 74.922  
**As**  
Arsenic  
[Ar] 3d<sup>10</sup>4s<sup>2</sup>4p<sup>3</sup>  
Metalloid

# Results: Risk Factors Other than Water

# Public Health Actions

- Confirmed the effectiveness of FL Safe Water Restoration efforts
- Two “control” households identified as high-risk and qualified for mitigation
- Increased awareness of arsenic exposure and need to test private wells
  - Media coverage
  - Fact sheets and communication tools

# Flooding Health Impact Assessment (HIA)

- CDC: “process that helps evaluate the potential effects of a plan, project, or policy before it is built or implemented”
- Non-tropical extreme flooding event in Pensacola, FL
  - April 29-May 3, 2014
  - Peak rainfall of 15.5” in < 24 hours
- Significant road and bridge damage, multiple sanitary sewage lift station failures, power outages, raw sewage overflows, and multiple fatalities

# Questions and Methods

## Questions

- What types of injuries, deaths, other health effects associated with flood event?
- Are there policy changes that could have resulted in fewer health effects during a similar future flood event?

## Methods

- Multiple Tracking health datasets used
  - Examined all-cause injury and mortality, asthma/respiratory effects, enteric diseases, mental health referrals
  - Exposure window varied by health condition of interest
- Compared event period to a baseline period

# Exposure Windows by Health Condition

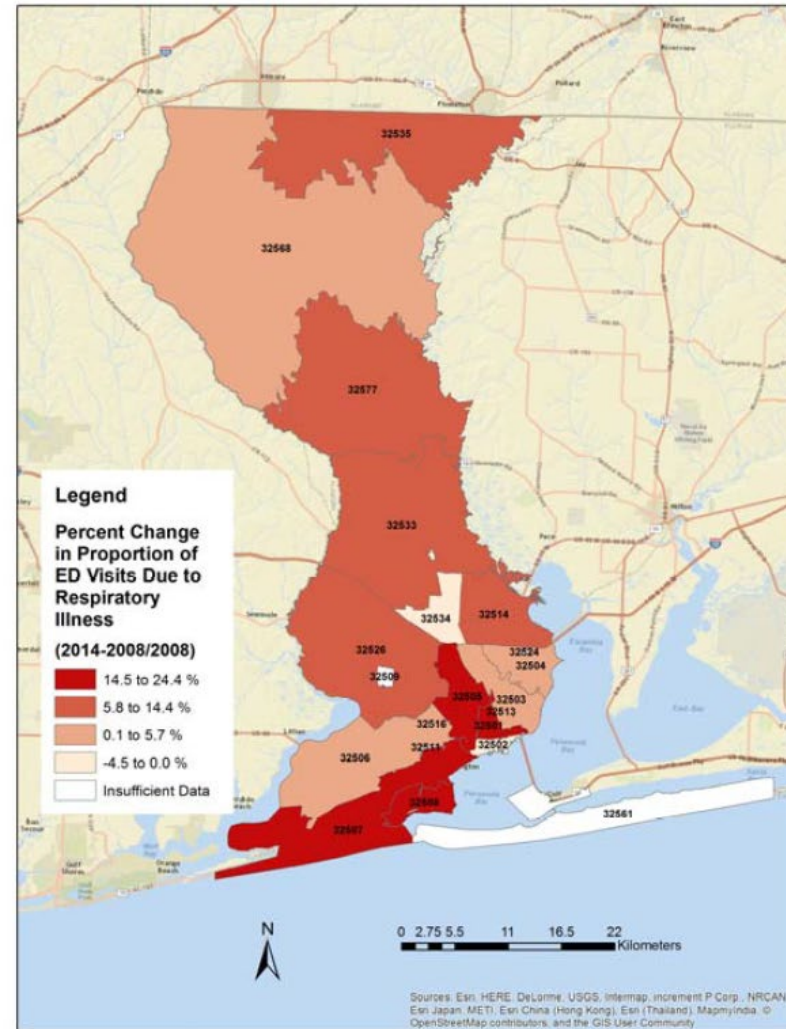

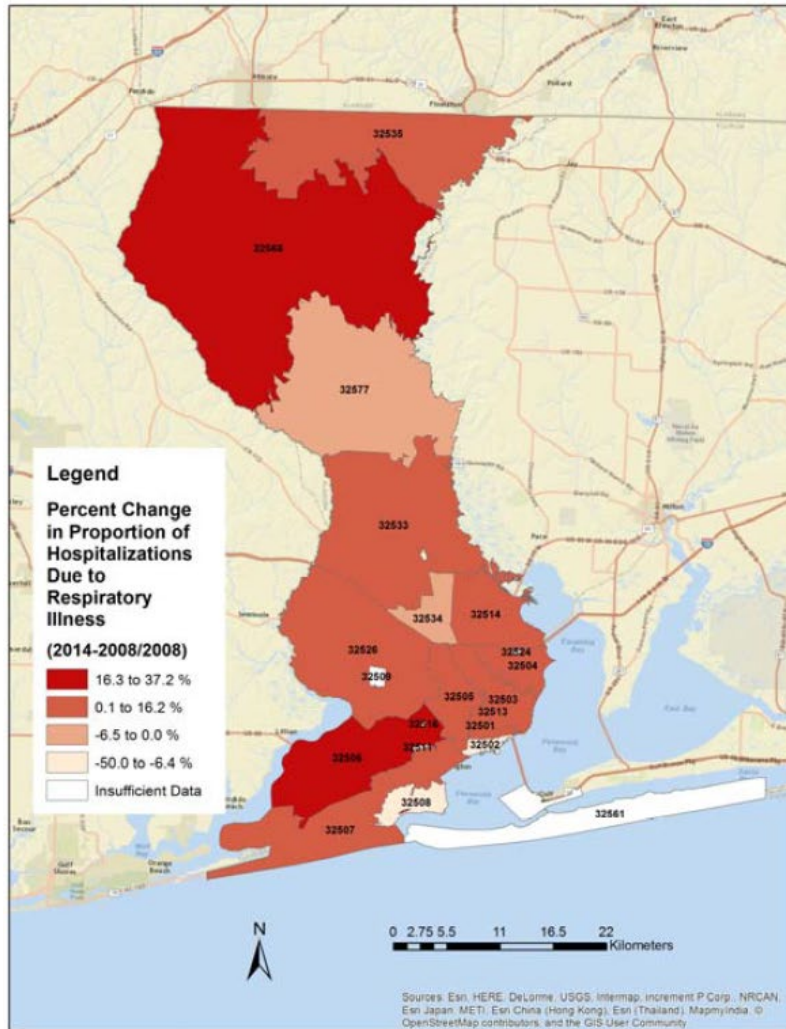

Health Outcome	Data Source	Exposure Windows <sup>a</sup>	Dates
All-cause injury	AHCA	Event + 14 d	April 29 to May 17
All-cause mortality	Vital statistics	Event + 30 d	April 29 to June 2
Asthma and other respiratory effects	AHCA	Event + 60 d	April 29 to July 2
Enteric diseases	Merlin	Event + 30 d	April 29 to June 2
Mental health conditions	AHCA (ED only)	Event + 30 d	April 29 to June 2

*Abbreviations: AHCA, Agency for Health Care Administration; ED, emergency department; Merlin, State of Florida notifiable disease reporting system, FDOH Bureau of Epidemiology.*

*<sup>a</sup>Period of interest includes the 5-day event period (4/29-5/3) plus the additional days in the exposure window. The control period used the same calendar dates for the year 2008. Note—vector-borne diseases are not included in final analysis because of very low numbers.*

# Results

# Public Health Actions

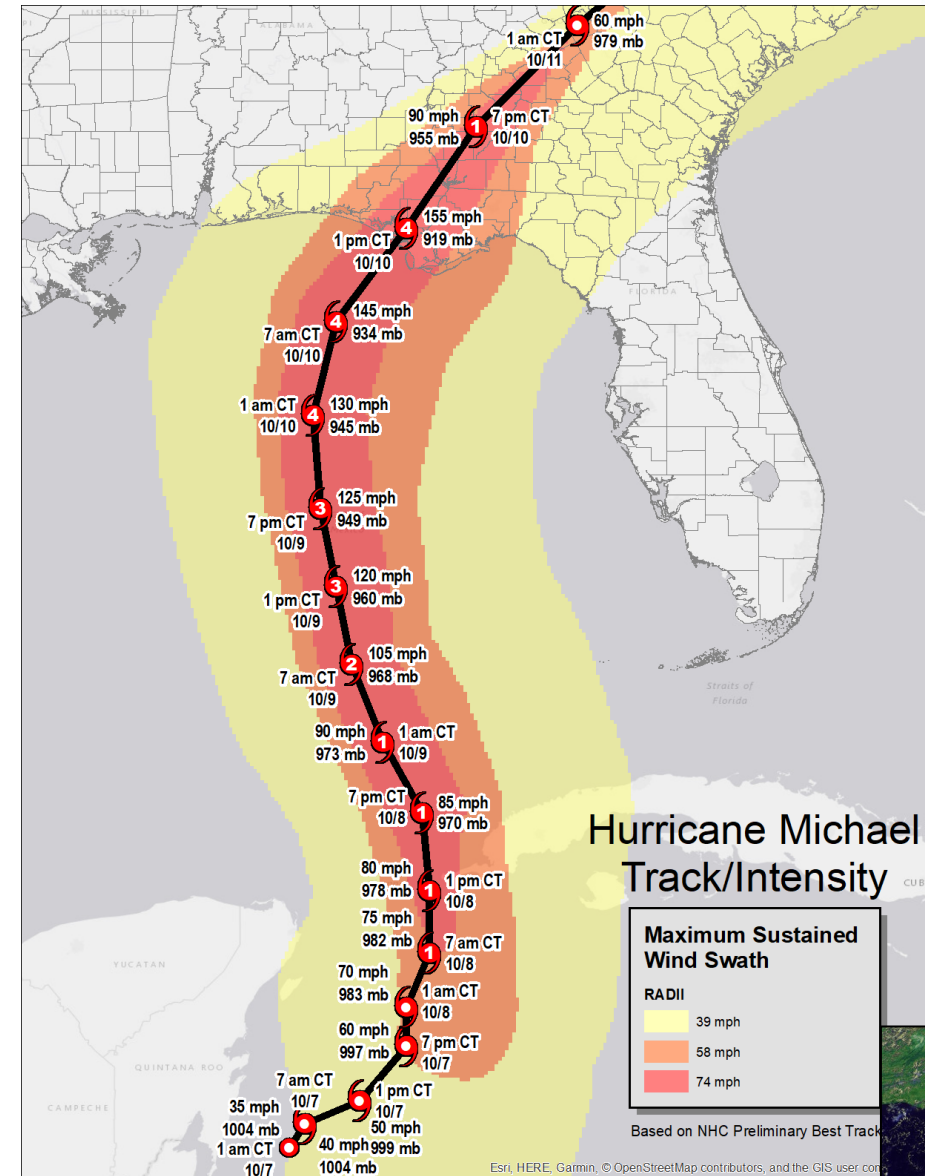

- Sewage lift stations
  - Raise electrical panels on lift station housing structures
- Environmental sampling
  - Better planning for personnel considerations, development of “strike teams”
- Waste disposal considerations
  - Air monitoring around demolition & construction disposal sites

# Post-Hurricane CASPER

- Community Assessment for Public Health Emergency Response
  - A rapid needs assessment designed to provide public health leaders with information about a community to make informed decisions
- Hurricane Michael
  - Category 5, October 10, 2018
  - Winds > 160mph; storm surge 9-14'
  - 45,000+ structures damaged; 3,000 destroyed
  - 50 deaths
  - \$18.4 billion in losses

Source: National Hurricane Center, <https://www.weather.gov/tae/HurricaneMichael2018>.

# Objective and Methods

## Objective

- Assess community preparedness and impacts experienced by Panhandle residents after Hurricane Michael

## Methods

- Standard CASPER methodology
- 30x7 two-stage cluster sampling design to select 210 households
- Questionnaire on demographics, housing, hurricane preparedness, and impacts, plus suicide behavior & ideation

# CASPER Study Area

CASPER	County	Urban Status <sup>1</sup>	Population <sup>2</sup>	Poverty <sup>2</sup>	Contact Rate <sup>3</sup>	Cooperation Rate <sup>4</sup>	Completion Rate <sup>5</sup>
Coastal	Bay	Urban	175,216	12.4%	40.8%	69.8%	84.8%
(Oct/Nov 2019)	Gulf	Rural	14,192	15.1%			
Inland	Calhoun	Rural	13,648	20.3%	51.5%	70.6%	89.1%
(Jan 2020)	Gadsden	Rural	43,826	21.9%			
	Jackson	Rural	47,319	19.5%			

1. US Census Bureau, Census 2010. Rural:  $\leq 100$  persons per square mile.
2. US Census Bureau, Census 2020.
3. Completed interviews out of all households where contact was attempted.
4. Completed interviews out of all households where contact was made.
5. Completed interviews out of all interviews targeted.

# Hurricane Readiness

## Coastal Counties

- Evacuated before or after? 57.6%
- Emergency supply kit available? 74.4%

## Inland Counties

- Evacuated before or after? 42.6%
- Emergency supply kit available? 66.3%

# Damage & Economic Losses

Variable	Category	Coastal Counties	Inland Counties
Damage to Home	Destroyed	9.9%	5.8%
	Damaged but repairable	68.2%	57.4%
	Minimal to no damage	20.9%	36.3%
Damage Costs	Mean (median)	\$79,653 (\$50,000)	\$32,289 (\$15,000)
	Range	\$240-565,000	\$35-250,000
Home Repairs	Completely repaired	27.0%	30.2%
	Somewhat repaired	54.7%	39.2%
	Not repaired at all	1.9%	9.9%
	Home destroyed	10.1%	5.3%

Columns will not add to 100% as we have not included percentage with missing or unknown information.

# General Health & Healthcare Access

Coastal Counties	%
Injured during storm or clean-up?	19.0
New/worsening conditions since landfall:	
Allergies	38.4
Asthma	27.5
Diabetes	4.7
Hypertension	17.0
Access to care:	
Difficulty getting meds	23.1
Needed primary care	73.5
Needed primary care and received it	70.2

Inland Counties	%
Injured during storm or clean-up?	9.0
New/worsening conditions since landfall:	
Allergies	19.8
Asthma	10.2
Diabetes	6.4
Hypertension	12.7
Access to care:	
Difficulty getting meds	7.6
Needed primary care	38.0
Needed primary care and received it	38.0

# Mental Health & Mental Healthcare

Variable	Category	Coastal Counties	Inland Counties
Access	Needed mental healthcare	20.9%	10.9%
	Unable to receive the services needed <sup>1</sup>	19.3%	26.3%
New or worsening conditions	Anxiety	43.2%	28.1%
	Depression	33.8%	22.1%
	Difficulty concentrating	25.5%	9.2%
	Trouble sleeping	34.7%	19.4%
	Agitated behaviors	29.7%	10.3%
	Increased alcohol consumption	4.6%	1.0%
Suicide ideation and risk	Low to no risk	94.3%	88.6%
	Moderate to high risk	5.7%	7.3%

1. Percentage of those unable to receive services out of all of those who needed services.

# Public Health Actions

- Increased education and communication regarding preparedness and recovery was identified
- Tailored risk messaging for inland areas is warranted
- Include clear explanations of options for pet-friendly shelters and care for elderly or those needing special accommodations

Thank you! Questions?
