Physician Assistant Professional Oath

I pledge to perform the following duties with honesty and dedication:

I will hold as my primary responsibility, the health, safety, welfare and dignity of all human beings.

I will uphold the tenets of patient autonomy, beneficence, non-maleficence and justice.

I will recognize and promote the value of diversity.

I will treat equally all persons who seek my care.

I will hold in confidence the information shared in the course of practicing medicine.

I will assess my personal capabilities and limitations, striving always to improve my medical practice.

I will actively seek to expand my knowledge and skills, keeping abreast of advances in medicine.

I will work with other members of the health care team to provide compassionate and effective care of patients.

I will use my knowledge and experience to contribute to an improved community.

I will respect my professional relationship with the physician.

I will share and expand knowledge within the profession.

These duties are pledged with sincerity and upon my honor.

Graduate Student Oath

I faithfully pledge to uphold my professional integrity by maintaining the highest standard of ethics and quality in my pursuit of academic and professional excellence.

I will uphold an unwavering commitment to report and interpret my research or professional findings with steadfast honesty and clarity.

I pledge to share openly and generously, my discoveries, obstacles and triumphs. I will work to improve our world through communication with peers and teaching students of all ages.

I will strive to be continually conscious of the responsibility that accompanies the endowment of my degree.

It is with tremendous pride and enthusiasm that I seal my commitment to advance humanity through extraordinary biomedical research, teaching or provision of service.

International Pledge for Nurses

In full knowledge of the obligations I am undertaking, I promise to care for the sick with all the skill and understanding I possess, without regard to race, creed, color, politics or social status, sparing no effort to conserve life, to alleviate suffering and to promote health.

I will respect at all times the dignity and religious beliefs of the patients under my care, holding in confidence all personal information entrusted to me, and refrain from any action which might endanger life or health.

I will endeavor to keep my professional knowledge and skill at the highest level and to give loyal support and cooperation to all members of the health team.

I will do my utmost to honor the international code of ethics applied to nursing and to uphold the integrity of the professional nurse.

Explanation of Physician's Oath

The Declaration of Geneva was promulgated by the World Medical Association in 1948. It has its roots in the great moral traditions that go back to ancient Greek Hippocratic medicine. It also seriously reflects the times in which it was written. That was immediately after World War II when the crimes of men against humanity were being revealed through such things at the Nuremberg Trial.

Physician's Oath

(Modified Declaration of Geneva)

Now, being admitted to the profession of medicine, I solemnly pledge to consecrate my life to the service of humanity. I will practice medicine with conscience and dignity; the health and life of my patient will be my first consideration. I will maintain the utmost respect for human life, never using my knowledge contrary to the laws of humanity.

I will hold in confidence all that my patient confides in me. I will not permit race, religion, nationality, party, politics or social standing to intervene between my duty and my patient. I will follow that method of treatment which I consider to be of greatest benefit, and never hesitate to confer with my colleagues in my patient's behalf. I will learn to distinguish when to treat aggressively and when to restrain my hand in the face of greater power.

I will maintain the honor and noble traditions of the medical profession. I will recognize hard-won scientific gains, and share my knowledge with those who follow. I will treat with respect all others in my profession. These promises I make freely and upon my honor.

J.G. (JACK) ELLIOTT AWARD

Vicki Hamm

Vicki Hamm is honored with the J.G. Elliott Award for her decades of service to her fellow Nebraskans, notably in the areas of health care, educational opportunity, and community health. For nearly 50 years, Hamm served as the expert on graduate medical education at the University of Nebraska Medical Center. She was a resource and friend to generations of house officers who made UNMC their home for residency and fellowship training. These physicians went on to touch the lives of their fellow Nebraskans and others, enriching our state and the world beyond.

Hamm was described as “the lifeblood of graduate medical education” at UNMC. She served as its friendly face and first phone call. She mentored and guided the careers of countless house officers and was the go-to person for more than 560 at UNMC at a time.

Hamm managed all internal reviews for the training programs as well as budget, orientation, International Medical Graduates sponsorship, National Resident Matching Program and Accreditation Council for Graduate Medical Education institutional and program reviews.

The late Robert Wigton, MD, once said that when he became assistant dean for graduate medical education in 1976, his first action was to hire Vicki Hamm. It proved to be his best decision, he later said.

She was praised as street smart and people smart – “emotionally intelligent.” She truly cared for the people she worked with, and they knew it. They also knew her skills and expertise were beyond reproach.

“Everyone knows that Vicki is the person who knows everything,” said Chandra Are, MBBS, upon her retirement in 2022. She was hailed as a national expert in the field, authoring “The Graduate Medical Education Committee Handbook,” published in 2008. By having an impact on these physicians at a crucial time in their careers, she had an impact on Nebraska and beyond.

Hamm is a native of Cook, Nebraska. She joined UNMC in 1975 after graduating from the Lincoln School of Commerce. She has two children. Hamm was a longtime official for high school volleyball matches and was honored as an over-35 All-American player herself. She was inducted into the Alpha Omega Alpha Honor Medical Society and earned UNMC’s Gold U award, the highest honor for medical center employees.

The J.G. Elliott Award is given annually to an individual who has made significant contributions to medicine and health programs for the state of Nebraska. It is awarded in memory of Jack Elliott, who served on the University of Nebraska Board of Regents for 20 years until his death in 1974. The University is proud to present this award to Vicki Hamm.

ACADEMIC ATTIRE

The caps and gowns worn during formal academic occasions in American colleges today are the direct descendants of the everyday costumes worn in the universities of Medieval England. Each school had its own special attire so that an Oxford student could be distinguished from a Cambridge student, or a divinity student from a layman. Several costumes from European institutions are worn in today's ceremony by Medical Center faculty.

Because of the tremendous growth of American colleges and the confusion which would result if each were to adopt a distinctive costume, the Intercollegiate Bureau of Academic Costume was organized. The Bureau has established a uniform code which over 700 institutions have adopted. Harvard, practically alone, still clings to its own traditional costumes.

The distinctions of the Code are simple, there being three types of gowns and three types of hoods for bachelors, masters, and doctors, respectively. The bachelor's gown has a long pointed sleeve, whereas the master's gown has a long closed sleeve, square at the end with an arc of a circle above the bottom. The sleeve extends well below the knee, the arm coming through a slit near the elbow. The doctor's gown is characterized by a voluminous bell-shaped sleeve on which appear three velvet bars and by velvet facings or panels of the same color down the front. The navy blue gown trimmed with scarlet velvet, worn by some members of the faculty, indicates fellowship in the American College of Surgeons.

The hood is the most important and distinctive feature of the Code. The hoods for all degrees are lined with silk in the official academic color or colors of the institution conferring the degree and have an edging or trim of velvet, the color of which indicates the course or faculty to which the degree pertains. The lining is exposed when the hood is worn. The bachelor's hood is rather short with a narrow velvet edging. It is not worn by candidates for the baccalaureate but only by those upon whom this degree has been previously conferred. The master's hood is considerably longer, has a wider velvet edging, and exposes more of the lining. The doctor's hood is easily recognized since, of the three types of hoods, it has the widest velvet edging, greatest length, and fullest exposure of the lining, and has wide panels at the side.

The black mortarboard cap with tassel is worn with each type of gown. Those holding a doctor's degree are privileged to wear a gold tassel. Masters and bachelors wear black gowns and tassels that are either black or of the color appropriate to the degree in which they are being graduated. Marshals wear cardinal tassels. The members of the Board of Regents wear doctor's gowns.

Candidates receiving degrees with distinction, high distinction and highest distinction wear medallions with red ribbons, white ribbons and red and white ribbons respectively. Candidates receiving medallions have demonstrated, during the course of their study, superior academic aptitude.

Candidates receiving degrees with Academic Excellence are advanced placement students in the Colleges of Nursing and Dentistry who have demonstrated outstanding academic achievement.

The colors, which may be observed at this commencement and which symbolize various courses or faculties, are as follows:

Dentistry.....	Lilac
Medicine	Green
Allied Health Professions	Green
Public Health	Salmon
Science	Golden Yellow
Philosophy	Royal Blue
Physical Therapy	Teal
Nursing	Apricot
Pharmacy.....	Olive Green
