**PROJECT DESCRIPTION:**

1. Briefly describe the specimen to be submitted for analysis. Include all relevant information such as the number of samples, source, species, age, chemical properties, etc.

2. Describe the objectives of EM analysis, i.e. what do you want to learn about the specimen and what types of data (e.g. images, measurements, composition) should we deliver to you?

3. References (that show similar images or analysis for background)
