Journal Analytics

• Information about the journal
  – Publisher
  – Dates of Coverage
  – SJR
  – SNIP
  – Citations
  – Docs
  – Percent Not Cited
  – Percent Reviews
SJR – SCImago Journal Rank

• Status of the journal
• Follows methodology similar to Google’s algorithm
• Weighted for each citation
• Note: Not an Impact Factor
  – Consider using when the journal does not have an Impact Factor
SNIP – Source-Normalized Impact per Paper

- Ratio of a source’s average citation count per paper to the citation potential in the specific subject field
- “Corrects” across research fields
  - Citations counts in Social Sciences are lower than Life Sciences
Other Features

- **Citations**
  - Total number of citations received by journal in each year

- **Docs**
  - Total number of documents published in the journal in each year

- **Percent Not Cited**
  - Percentage of articles not cited in each year

- **Percent Reviews**
  - Percentage of articles that are review
Journal Impact Factor

• Journal Citation Reports (JCR)
  – Impact factor of journal
  – Subject search
  – Journal title search

Multiple Authors Listed

• Why does this happen?
  – Scopus uses an algorithm to decide which documents get attached to each author
    • Includes names, affiliations, email addresses
  – When Scopus does not feel 100% certain of a match, they will create another profile
Combine Authors

• Use when other names listed are possible

  – May save group
Merge Author

• Use when other names are possible
• Use for the authors you know or if you are the author

• Steps:
  1. Review authors
  2. Select preferred name
  3. Review profile
  4. Submit merge request to Scopus
To determine which author names should be grouped together under a single identifier number, the Scopus Author Identifier uses an algorithm that matches author names based on their affiliation, address, subject area, source title, dates of publication, citations, and co-authors. Documents with insufficient data may not be matched, this can lead to more than one entry in the results list for the same author. By default, only details pages matched to more than one document in Scopus are shown in search results. About Scopus Author Identifier
